

RAVINDRA SUPEKAR

Test Engineer

@WIPRO LTD

Contact No. : +91 7757836126

E-mail ID : ravindrasupekar2020@gmail.com

EXPERIENCE PROFILE

Technology and Testing Professional with over **3+ years of experience** with **WIPRO LTD** in **Web Automation** testing, **Database** testing and Data migration testing (**ETL Testing**) management. Excellent understanding of the entire Software Development Life Cycle (**SDLC**) and Testing Processes, Techniques and Strategies.

- ☆ 3.2 years experience at WIPRO from Sept. 2020 – Till Date.
- ☆ Currently working as a Test Engineer and worked on major projects such as Kaiser Permanente USA, Smile Direct Club Health care USA and Heartlands Payments System & Reports USA for Healthcare & Payment domains.

PROFESSIONAL SUMMARY

- Good understanding of Software Development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**), Bug Life Cycle (**BLC**) and **Agile** Methodologies (**SCRUM**).
- Analyzed **Business Requirements**, **Data Mapping** specifications and develop Test **Plans**, Test **Scenario**, Test **Cases** & Traceability Matrix(**RTM**).
- Performed **Functional**, **Regression**, **Integration**, **Sanity** and **User Acceptance** testing.
- Identified and report software defects using defect tracking tool **JIRA** and provided detailed **Bug Reports**.
- Collaborated with Developers, Product Managers and Business Analysts to ensure clear communication of requirements and testing results.
- Good Expertise in identifying web elements by using ID, NAME, XPATH, CSS with the help of **Fire Bug** & **Selector Hub** plug-in.
- Working knowledge on Standalone application testing using **Selenium with Python**.
- Knowledge of web services automation using **PostMan**.
- Knowledge of **dimensional modeling** and **data warehouse** concepts, such as **star schemas**, **snowflakes**, **dimensions**, **facts** etc.
- Good Knowledge of Database concepts **SQL**, **Unix** scripting.
- Expert in writing complex SQL queries using **Functions**, **Joins** etc. to validate **record counts**, **data validation duplicate records**, invalid data types, **NULLs** and **data integrity**.
- Validating that **data transformations** logic align with the specified business rules and meet the intended objectives.
- Maintaining proper **documentation** for transparency, traceability, and repeatability in the ETL testing process (Like Test Plan, RTM, Test Cases, Defect Log, sign-off & approval etc.).
- Participate in documenting defects, resolve defects and coordinate with UAT team to get sign-off for the project.
- Hands on experience working with **SSIS package**, **Oracle** database and **MySQL**, **SQL Server Management Studio** etc.
- Perform **Data Analysis** to identify trends, anomalies, and insights within the data and use these findings to enhance the visualizations with the help of **PowerBI**.

TECHNICAL SKILLS

☆ Languages	:	Python, SQL, UNIX
☆ Automation Tool	:	Selenium-python, Pycharm, Pytest
☆ Functional Test Tools	:	Postman
☆ Bi Tools	:	Tableau, Power BI
☆ Test Management Tool	:	JIRA
☆ Database	:	Oracle 10/11g, SQL Server, MySQL
☆ Testing Methods	:	Agile (Scrum Methodologies), Waterfall, V- model
☆ Operating System	:	Linux, Microsoft Windows.
☆ Performance Test Tool	:	Apache JMeter
☆ ETL Tools	:	Microsoft SQL Server Integration Services (SSIS)

EDUCATION

Qualification	InstituteName	Marks

WORK EXPERIENCE IN WIPRO

- **Currently working as a Test Engineer in WIPRO LTD, Pune from September 2020 to Till date**

Project 1 :

Duration	:	Sept. 2020 – Jan. 2022
Client	:	Kaiser Permanente & Web Services, USA
Technologies	:	Manual-Functional, Database, Web Services Testing, ETL Testing.

Client Introduction:

Kaiser Permanente is one of the largest health care organization and having lot of services for their web application. The portal helps for customers to manage their hospitality needs such as finding health plan, enrolling health plan, scheduling and so on. Validate the web services for Kaiser Permanente and manage the services, API's and rest services using Postman.

Project Roles & Responsibility:

- Understand user stories/ test scenarios & prepare test cases.
- Conducted **End-To-End Testing** to validate the accuracy and functionality of healthcare software modules.
- Collaborated with healthcare professionals and developer teams to clarify requirements and resolve defects.
- Conducted user acceptance testing (**UAT**) to ensure healthcare applications met user expectations.
- Designed and executed **Regression Tests** to validate the stability of healthcare software during updates.
- Maintained detailed **Test Documentation**, including test plans, test cases, and test summary reports.
- Use **JIRA** as bug reporting tools and track defects, ensuring their timely resolution.

Project 2 :

Duration : Feb.2022 – July 2022
Client : Smile Direct Club Health care, USA
Technologies : Manual-Functional, Automation testing using selenium- Python, Pytest & Postman .

Client Introduction:

Smile Direct Club provides safe and effective doctor-prescribed and monitored clear aligners for people with mild to moderate crowding and spacing. While our innovative tele- health platform removes the hassle of in-office check-ins, you'll have the peace-of-mind of professional treatment throughout your smile journey.

Project Roles & Responsibility:

- Understanding the story and Designed and implemented Selenium-based automated tests using **Selenium-Python** and **Pytest** for healthcare software applications.
- Testing the **API's** in **Postman** and in **Pytest** scripts, verifying functionality in healthcare integrations.
- Maintained and updated automated test scripts and test data for healthcare applications.

Project 3 :

Duration : July 2022 – Till Date
Client : Heartlands Payments System and Reports, USA
Technologies : Manual Testing, ETL Testing, PowerBI.

Client Introduction:

Heartland Payment Systems is a Global Payments company. Global Payments Inc. (NYSE: GPN) is a leading worldwide provider of payment technology services that allow our customers to accept all payment types across a variety of distribution channels in many markets around the world.

Project Roles & Responsibility:

- Conduct **End-To-End Testing** of ETL processes that handle payment data.
- Verify the **Accuracy** and **Completeness** of payment **Data Transformations** and aggregations.
- Verify that encryption and data masking techniques are properly applied.
- Verify that ETL processes apply the **Correct Data Transformation** rules for payment data, including currency conversion and payment type validation.
- Conduct **Regression Testing** to ensure that changes or updates to ETL processes do not adversely impact the accuracy and security of payment data.
- Perform **Load Testing** to evaluate the performance of ETL processes during peak payment processing periods.
- Create and maintain detailed **Test Documentation**, including test plans, test cases, and test reports specific to payment ETL processes.
- Validate the **Integration** between ETL processes and various payment gateways, ensuring that transactions are processed accurately and securely.
- Developing visual reports, and dashboards using **Power BI** desktop.

Declaration

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
