Profile Summary

With years of industry experience in automation and manual testing, I have developed expertise in Selenium WebDriver using Page Object Model and have a good understanding of creating custom Xpath identifiers for locating objects on web pages. I have experience in writing test cases using locators, WebDriver methods, Java programming, and TestNG annotations. I am well-versed in Data Driven Testing, Multiple browser testing, Cross Browser Testing, and Parallel Test Execution. I have knowledge in Maven, Jenkins, Git, and BDD-Cucumber, as well as API testing using Postman. I possess excellent interpersonal, communication, and analytical skills, with demonstrated abilities in customer relationship management.
