Chikodi

Summary

- Experience in using SIEM tools such as **DataDog**, **New relic**, **Splunk**, **Sentinel**.
- Proficient in using NSM tools such as **Icinga**
- Demonstrates experience in incident response, ensuring timely and effective actions are taken during security incidents.
- Experience in utilizing **Jira** and **SMT** tools for incident management.
- Strong knowledge and experience in utilizing endpoint protection tools and platforms including **Carbon Black**.
- Proficient in **Git** and Subversion for robust Source Code Management.
- Experienced in automation and integration with **Jenkins** and **Maven**.
- Familiar with major cloud service providers, particularly **AWS**.
- Profound understanding of Infrastructure as Code, utilizing tools like **Ansible**.
- Expertise in software containerization using **Docker** and orchestration with **Kubernetes**.

Skills

- | | |
|-------------------------------------|-----------------|
| • Jenkins | • Basic of Java |
| • Maven | • Ansible |
| • Amazon Web Services configuration | • Terraform |
| • Docker | • Chef |
| • Kubernetes | • Grafana |

Experience

Member Technical Staff

HCL Technologies, Bangalore

02/2021 - 11/2022

Project - IoT Applications and Operations by BOSCH Technologies

Description –

Providing support for IoT-based applications, including network monitoring, incident resolution, change management, security threat detection, and ensuring availability.

Responsibilities -

- Monitoring the servers using Icinga, New relic, DataDog for better performance & availability.
- Efficiently executed shut downs for planned maintenance and resolving incidents.
- Perform regular maintenance tasks such as patching, upgrading, etc.
- Used support tickets to track and speed up incidents using SMT, AppDynamics, JIRA.
- Created step-by-step procedures in runbooks for day-to-day tasks to streamline workflow and improve efficiency.

Tools - Icinga, DataDog, New relic, SMT, AppDynamics, JIRA

Training/Courses

DevOps Course

StarAgile Classes 2022

Project - Automated CI/CD Pipeline Implementation for AWS Cloud Product

Responsibilities –

- Implemented version control with Git, ensuring effective tracking of code changes and version history.
- Designed and configured Jenkins pipelines for automated build, test, and deployment processes.
- Utilized Docker for containerizing applications, enabling consistent deployment across different environments.
- Managed infrastructure creation and configuration using Terraform, reducing manual effort and time consumption.
- Employed Ansible for efficient configuration management, ensuring consistency across environments.

Tools - AWS, GIT, Jenkins, Docker, Terraform, Ansible

Education

- Completed Bachelor of Engineering (BE/ETCE) 2020 from Sanjay Ghodawat institute with First class with distinction (74 % Marks).
- Completed HSE 2015 from Alvas Preuniversity Moodbidri, Karnataka with 82% Marks.
- Completed SSE 2013 from K.L.E Society's English medium school Nipani, Karnataka with 86% Marks
