Career Summary

Secure a responsible career opportunity to fully utilize my training and skills, while making a significant contribution to the success of the company. Seeking to utilize automation and troubleshooting know-how to maintain and improve cloud infrastructure and processes.

Skill Set

Cloud Technologies	: AWS (Amazon Web Service) EC2, S3, VPC, ELB, ASG, SNS, CLOUDWATCH, RDS
DevOps Tools	: Git, Jenkins, Maven, Ansible, Docker, Kubernetes, SonarQube.
OS Platform	: Linux, windows.

Professional Summary

- Over all 4 years of experience **AWS** and **DevOps** Engineer.
- 9 months of experience in UnitedHealth with Design, Development, having strong knowledge in planning, designing, requirement gathering, implementing, and troubleshooting of Application Architecture
- UnitedHealth Group Incorporated is a for-profit American multinational managed healthcare and insurance company based in Minnetonka, Minnesota.
- It offers healthcare products and insurance services. UnitedHealth Group is the world's seventh-largest company by revenue and the largest healthcare company by revenue, and the largest insurance company by net premiums.
- UnitedHealthcare revenues comprise 80% of the Group's overall revenue.
- Designing and implementation of public and private facing websites on AWS.
- 2 years of experience in McKesson working DevOps Tools such as **Git, Jenkins, Ansible, Docker, Kubernetes**
- Knowledge on **Terraform**

Work Exposure

Company : Code Bind Technologies
Designation : Analyst
Duration : 2016 Mar to 2020 Feb

Project	Mycamu
Role	AWS
Environment	Linux, Windows, EC2, S3, VPC, ELB, ASG, SNS, CloudWatch, RDS.

Roles & Responsibilities:

- Having Good knowledge of AWS services like **Elastic Compute Cloud (EC2), Elastic Load Balancers, ASG, IAM, S3, VPC, RDS, Cloud Watch.**
- Utilized **Cloud Watch** to monitor resources such as **EC2, CPU memory, EBS volumes**; to set alarms for notification or automated actions; and to monitor logs for a better understanding and operation of the system.
- Setup/Managing Databases on **Amazon RDS**. Monitoring servers through **Amazon CloudWatch, SNS.**
- Setup and managing security groups, **VPC** specific to environment.
- Setup and configured **EIP** to EC2 instances
- Designing and Deploying Highly scalable infrastructure using **ELB** and Auto Scaling groups.
- Working on troubleshoot in **EC2** instances and resolving the issues will be tracked incidents immediately.
- Creating **S3** buckets and managing policies for **S3** buckets and Utilized **S3** bucket and Glacier for storage and backup on **AWS**.
- Creating **SNS** topic and added Mail subscription to notify the status of instance.
- Attaching or Detaching **EBS** volume to AWS **EC2** instance.

Work Exposure

Company : Firstsource Solutions Pvt Ltd
Designation : Senior Analyst
Duration : 2020 Mar to 2023 Jan

Professional Experience

Client 1:

Project	UnitedHealth
Role	AWS/DevOps Engineer
Environment	Linux, EC2, S3, VPC, ELB, ASG, SNS, CloudWatch, RDS, IAM, Git, GitHub, Jenkins

Roles & Responsibilities:

- Hand-on experience **on EC2, ELB, AUTOSCALING, EBS, VPC, S3, SNS, CLOUDWATCH, RDS.**
- Created topics in SNS to send notifications to subscribers as per the requirement.
- Attaching or Detaching **EBS** volume to **AWS EC2** instance.
- Utilized Cloud Watch to monitor resources such as **EC2, CPU** memory, **EBS** volumes; to set alarms for notification or automated actions; and to monitor logs for a better understanding and operation of the system.
- Maintaining the source code in **GIT** for various applications.
- Worked on Creating **GIT** Branches and creating Pull request for approval.
- Responsible for creating the branches and tagging the code.
- Used **Ansible** for Configuration Management.
- Automated the continuous integration and continuous deployments by using **Jenkins**.
- Installed Jenkins on a **Linux** machine and created a master and slave configuration to implement multiple parallel builds through a build farm.
- With the help of **IAM** created roles, users and groups and attached policies to provide minimum access to the resources.
- Managed build results in **Jenkins** and deployed using workflow.

Professional Experience

Client 2:

Project	McKesson
Role	AWS DevOps/Engineer
Environment	Linux, Git, GitHub, Jenkins, Maven, SonarQube, Ansible, Docker, Kubernetes

Roles & Responsibilities:

- Create and maintain fully automated **CI/CD** pipelines for code deployment using **Jenkins**
- Involving **Ansible** for configuration management.

Working experience on **Docker** containerization tool and deployed various applications to various environments.

- Containerizing applications with Docker. Experience knowledge on creating custom Docker Images using **Dockerfile**.
- Setup/Managing **VPC**, Subnets; make connection between different zones; blocking suspicious ip/subnet via **ACL**.
- Experience in build tools and packaging the source code using **Maven**.
- Involved in the release process and deployed applications (**WAR and JAR**) to the Tomcat
- Involved in development of test environment on Docker containers and configuring the **Docker Containers** using **Kubernetes**.
- Design, develop, and maintain **Kubernetes** clusters and application.
- Monitor and troubleshoot **Kubernetes** clusters and applications.
- Automate deployment and scaling of **Kubernetes** clusters and applications.

Graduation : Master of Computer Application in **PRIST UNIVERSITY** at Thanjavur

Personal details

Father's Name	: J.Rajadurai
