Backend Developer

PROFESSIONAL SUMMARY:

- Having **1 years** of Professional experience in Analysis, Design, Development, Maintenance, and Implementation of Enterprise applications using **Java** and **J2EE Technologies**.
- Strong foundation in **Object-Oriented Programming** principles encapsulation, abstraction, inheritance, and polymorphism.
- Hands-on experience in building and designing Enterprise Applications using technologies such as **Core Java, Spring Boot, Hibernate JDBC** and **Spring Framework**.
- Experience using Core Java concepts like **Collections, Multithreading, Serialization, and Exception Handling**.
- Experience designing and developing **RESTful Webservice** applications, implemented **Micro services** and **Spring Boot** applications.
- Experience in developing Web Applications with various Open Source frameworks: **Spring Framework, Hibernate ORM** and **Spring JPA**.
- Experienced in **RDBMS** technologies like **Oracle, MySQL** and **MongoDB** writing complex queries with **SQL** and **Stored procedures**.
- Hands on experience in creating **Repository Layer, DTO Layer, Service Layer** and **Configuration of application .properties file**.

TECHNICAL SKILLS:

Languages	Java(Core Java, Java 1.8,J2EE)
Enterprise Java	JDBC, Log4J ,API,JPA,Hibernate
Mark-up/XML Technologies	JSON
Tools & Framework	Hibernate , JPA, SpringBoot, Log4J ,Apache Maven and Gradle
Web Servers & Web Services	Apache Tomcat and RESTful Web Service
Databases	Sql, MySQL
Development Tools	Eclipse, IntelliJ, STS (Spring Tool Suite), PostMan
Version Control Tools	GIT
Operating System	Windows 10,11

Experience

PROFESSIONAL EXPERIENCE:

Company Name : C-Square Info Pvt. Ltd
Designation : Backend Developer
Project Name : Live Order Project
Duration : 1 year (From [Oct 2022] to [Oct 2023])
Team Size : 9
Tools Used : IntelliJ, PostMan, Tomcat, MySql.
Process : Agile Scrum process

Project Description : Live order is to help pharmaceutical companies manage the logistics of their distribution & retail operations. This includes tracking the entire sales life cycle of pharmaceutical products – beginning from the manufacturer through the distributor and retailer & finally ending with the customer. We developed & deployed enterprise-process software for automation of routine transactions. We also provide managers & decision makers to visualise & analyse the performance of entire businesses in real time.

Responsibilities:

- Worked extensively on developing Controllers, Modules and Entity classes & used Microservice architecture with Spring Boot based service through RESTful web services using POSTMAN.
- Use **Hibernate, Spring JPA** as ORM Frameworks to implement Persistence layer for POJOs and perform database operations.
- Implemented **OOP's** concept and integrating **Utility Layer** with **Email API**.
- Used MySQL as application database, created relational models, stored procedures.
- Worked on **SQL** and **MySQL** Programming in database.
- Implemented the kafka configuration with the application.
- Used **GIT** for version control of the application.
- Used **Log4J** to capture the log that includes runtime exceptions.
- Fixing **bugs** communicated by Tester.
- Used **Agile** as a development methodology, participated in Daily Agile meetings.

Environment: Java/J2EE , Spring Boot, Log4J, RESTful Web Services.

EDUCATION:

Bachelor of Technology from Siddaganga Institute of Technology (SIT) in Visvesvaraya Technological University – June 2020
