

Ramanath Naik

LinkedIn: www.linkedin.com/in/ramanath-naik

Location: Bengaluru, Karnataka, India

Email: ramanathnaik23@gmail.com | Mobile: 8151009115

TECHNICAL SKILLS

Languages	: Core Java , Advanced Java , Go, HTML,CSS, C,C++
Frameworks	: Spring , Spring Boot , Spring MVC, Hibernate , JDBC , Thymeleaf, Web Services (SOAP and REST), Angular 14, JAX-WS, AXIS, Microservices
Dev Tools	: Eclipse IDE ,IntelliJ IDE, Jboss, Apache Tomcat, Git, GitHub , Clear Case, XLD, Sonarqube, MySQL , DB Visualizer, SoapUI , Postman
APM Tools	: Dynatrace, Apache JMeter
DevOps	: Jenkins, Docker, Kubernetes,Amazon Web Services (AWS), including EC2, S3, RDS, and IAM

EXPERIENCE

Software Engineer

SLK SOFTWARE

Apr 2023 – Present

Bangalore, Karnataka, India

EMR-DCX E-Commerce Observability

Sept 2023 – Present

- Led Emerson's digital experience enhancement initiative, achieving a 20% improvement in metrics and a 15% reduction in system downtime through real-time user monitoring.
- Collaborated on migration activities, introducing a low touch/high visibility model for effective team augmentation.
- Orchestrated SLK team to enhance system stability by 25% and integrated DevOps principles, resulting in a 20% reduction in deployment failures.
- Executed a phased approach for comprehensive real-time user monitoring and DevOps pipeline, ensuring proactive issue resolution.
- Utilized Dynatrace's AI to improve issue identification by 15% and manage complex HCL Commerce ecosystems, contributing to a 20% increase in system efficiency.
- Applied DevOps practices by integrating **Jenkins**, **Docker**, and **Kubernetes** for streamlined process optimization, achieving resilient monitoring and a 15% improvement in customer satisfaction through enhanced real-time user journey tracking.

Nepis to Conjur Remediation

Apr 2023 – Aug 2023

- Managed VOYA's ServiceID Repository to enhance efficiency by maintaining a centralized repository, resulting in a 25% reduction in the time spent by applications searching for ServiceIDs.
- Implemented and Managed CyberArk CCP ensured secure credential management for **Docker**, **JBoss** and **Batch** applications.
- Achieved a 30% reduction in security incidents related to credential breaches.
- Seamless implementation resulted in no disruption, preserving the existing behavior and logic of applications.

Associate Software Engineer

SLK SOFTWARE

Apr 2022 – Mar 2023

Bangalore, Karnataka, India

- Implemented functionalities using Core Java and Developed Web Services exposed to the client using **JAX-WS**(JavaAPI for XML).
- Experience in developing **Soap** and **REST web services** and consuming using WSDL .
- Applied **RESTful** principles, resulting in a 15% improvement in overall API performance.Contributed to a 20% reduction in response time for RESTful endpoints.
- Applied extensive experience in using Dynatrace for **root cause analysis**, resulting in a remarkable 30% reduction in issue resolution time and proactively improved system reliability by 25% through vigilant monitoring of logs.
- Troubleshoot and **fixed bugs** and issues in the backend to ensure **smooth operation** of the applications.
- Executed Test-Driven Development utilizing frameworks such as **Junit**, **Mockito** , ensuring robust code quality and enhancing the efficiency of defect identification by adhering to industry best practices.

- Trained in Core Java, Spring, SQL, AWS .
- Successfully applied acquired technical skills from training to independently develop small-scale applications, showcasing proficiency and practical application of learned technologies.

PROJECTS

Employee Directory Management System

TechStack : Spring Boot, Thymeleaf, MySQL

- Users can view a list of employees, facilitating efficient employee management.
- Implement an intuitive Web UI with buttons for adding, updating, and deleting employees.
- Leverage **Thymeleaf** templates to seamlessly integrate the front-end with the Spring Boot back-end.

Full Stack E-Commerce website with Angular and Java Spring Boot

TechStack : Spring Boot, Angular 14, MySQL, TypeScript

- Developed a robust Spring Boot back-end, leveraging REST APIs and MySQL for efficient data management.
- Integrated **Angular** and **Spring Boot** to create a seamless shopping cart functionality, ensuring smooth communication between the front-end and back-end.
- Implemented credit card payment processing using the Stripe API, enhancing the application's functionality and security.
- Utilized industry-standard development tools including IntelliJ, VS Code, Maven, and npm to ensure efficient and modern coding practices.

Automated Deployment of Spring Boot Application

TechStack : Spring Boot, Jenkins, Git, Docker, Kubernetes

- Automated the deployment workflow, integrating Jenkins for continuous integration, Docker for containerization, and Minikube for local Kubernetes cluster setup.
- Orchestrated Jenkins pipelines to automate builds, tests, and Docker image creation, ensuring a seamless CI/CD process.
- Implemented Kubernetes Deployment for scalable application replicas and a Service object for internal communication within the cluster.
- Configured and managed Docker containers to encapsulate the Spring Boot application, enhancing portability and efficiency.
- Conducted comprehensive testing to validate deployment, ensuring reliability and optimal performance of the deployed application.

EDUCATION

Alva's Institute of Engineering and Technology

Moodbidri, Mangaluru, India
2016 – 2020

7.52CGPA
Bachelor of Engineering (B.E), Electronics and Communication

Hanumanth Benne Govt. P.U. College

Kumta, Karnataka, India
2016

78.66 percentage
Higher Secondary Schooling, PCMB

CERTIFICATIONS

- Cloud Computing with **AWS** offered by **Great Learning** Academy
- **DevOps** Crash Course issued by **Uplimit**
- **JavaScript Essentials 1** issued by **Cisco**
- **Spring Boot 3, Spring 6 & Hibernate** course on Udemy
