

SUMMARY

Software Test Engineer with more than 1.6 years of experience in testing domain and worked for one of the Networking based organization. Demonstrated history of debugging script issues by utilizing my skill in python programming and also Troubleshooting and resolved issues in a product by performing RCA. And now looking for further opportunity to work as a Test Engineer or/and Test Automation Engineer.

WORK EXPERIENCE

Software Dev Associate Engineer in Test at *SONICWALL Technology System India PVT LTD, Bangalore*
Feb 2023 – Jan 2024

- ✦ Involved in Automation testing of MSW product, which manages the license of SonicWALL's all products and services in a one place.
- ✦ Wrote and maintained scripts to perform an UI Automation and used python unittest framework for the project.
- ✦ Used an Automation Selenium Tool into the development process, resulting in a 30% reduction in software release cycles and improved overall product quality.
- ✦ Contributed in writing the libraries, methods and Test Scripts to project.
- ✦ Analyzed test case failure by debugging code to find out the root cause of issue.
- ✦ Defect Logging and Tracking using Jira.
- ✦ Raised a few critical Bugs during automation phase, with P1 priority and collaborated with development team for defect resolution and completed retesting.
- ✦ Maintained the execution reports and defect reports.
- ✦ Executed automation run in various test and production environments and documented the result for every run.

Test Associate Engineer at *SONICWALL Technology System India Pvt. Ltd, Bangalore.* Jun 2022 – Jan 2023

- ✦ Contributed to the manual testing processes for SonicWALL's VPN product, "Secure Mobile Access (SMA)". Played a key role in validating the product's reliability as per the requirements.
- ✦ Hands-on experience with various functional testing such as smoke, sanity and regression testing and also done API testing with – https request and response validations.
- ✦ Hands-on experience in writing test scenario, test cases and execution, collaborated with team members in Test case review process.
- ✦ Raised a bug and tracked in jira, troubleshooting issues, and coordinated with development team for defect resolution and involved in Retesting and reporting results.

Graduate Trainee Engineer, at *Metamor Technologies Pvt.Ltd, Bangalore.* Feb 2020 – Jul 2020

- ✦ As an intern involved in project on "Demand forecasting of Inward and Outward Inventories in WMS" Using predictive analytics.
- ✦ Project is developed using time series algorithms such as ARIMA, Seasonal ARIMA model.
- ✦ Utilized a "BIGHAAT" warehouse data for model development.
- ✦ Build a predictive analytics model for inventory managementsystem using huge historical data.
- ✦ Used Mean Square Error (MSE) as model evaluation technique.
- ✦ We found out Seasonal ARIMA as best model with least error rate amongst of models.

EDUCATION

Masters in Computer Applications (MCA)
BMS College of Engineering, Bangalore

Graduation: Aug-2020
CGPA – 7.3 on 10.0

Course Work: Design and Analysis of Algorithms, DBMS, Software Engineering, Data Mining, Mobile Computing, Agile Software Development, Computer Networks, Python programming, Info. Security system and Machine learning.

Bachelors in Computer Applications (BCA)
Davanagere University,
Davanagere

Graduation: Jun-2017
Total percentage – 76

TECHNICAL SKILLS:

- ✦ Languages : Python Programming (Intermediate), SQL(Intermediate) and Java (Basics)
- ✦ Testing Tools : Selenium web driver, Postman.
- ✦ Framework : Unittest and Pytest
- ✦ Methodologies : Agile/Scrum for STLC process and Waterfall
- ✦ Design Patterns : Page Object Model (POM)
- ✦ Project Management : Jira, Confluence
- ✦ Testing Types : API, Functional and Web UI
- ✦ Version Control : Git, GitHub and GitLab
- ✦ Web Technologies : HTML5 and CSS3
- ✦ Operating System : Linux (Ubuntu 20.04) and Windows 10
- ✦ IDE's used : Pycharm, VS Code
- ✦ Networking concepts : TCP/IP, OSI model, Routing, HTTP and HTTPS, DNS, DHCP and other protocols.

Soft skills:

- ✦ Demonstrated a good communication (both written and verbal) within a team and cross functional team.
- ✦ Attention to details, for effective test coverage and documentation, possible bug identification.
- ✦ Ability to work in team as well as individual
- ✦ Flexible enough to work with different projects.

Certifications:

- ✦ Completed certification of “Microsoft Data science Essentials” by Edx.
- ✦ Completed course on “Master the Programming in Python” from Udemy.
- ✦ Completed a certification on “Certified Scrum Fundamental” by SCRUMstudy (*Global Accreditation Body for Scrum and Agile Certifications*).
