

RANJITHA PRAKASH

+91-6360461404 ◇ Bengaluru, Karnataka

ranjithapyadav17@gmail.com ◇ [linkedin.com/in/ranjitha-p](https://www.linkedin.com/in/ranjitha-p)

OBJECTIVE

To seek a competitive and challenging environment where I can serve the organization, establish a path to help the company meet and achieve its goals and, in the process, achieve success.

EDUCATION

Master of Engineering[M.E] , Manipal School of Information Sciences (MSIS),Manipal	2021-2023
Coursework: Cloud Computing	GPA-8.36

Bachelor of Engineering[B.E] , Sri Siddhartha Institute of Technology (SSIT)	2017 - 2021
Coursework: Information Science and Engineering	CGPA-6.69

SKILLS

Cloud Infrastructure	Amazon Web Services, Azure
Framework / Build Tools	Jenkins
Source and Version Control	Git, Github
Configuration Management Tool	Ansible, Chef
Application Server	Apache Tomcat Server
Provisioning Tool	Terraform
Containerization	Docker, Kubernetes
Visualization Tool	Grafana
Monitoring Tools	Cloud Watch, Prometheus, Nagios, Grafana
Programming Languages	Java, C, YAML, Golang, Ruby
Other tools	Maven, Microservice, Infrastructure As Code (IAC)
Operating System	Linux(Unix), Windows
Software Development Life cycle	Waterfall, Agile, Scrum
Communication Tool	Slack

EXPERIENCE

Devops Engineer Intern	JULY 2022 - PRESENT
Beckman Coulter Life Sciences	<i>Bengaluru, Karnataka</i>

- Deployed and maintained monitoring systems for multiple websites, resulting in improved up-time and faster response times.
- Developed and maintained custom scripts to automate tasks such as log analysis, server health checks, and incident response.
- Collaborated with development teams to improve application performance and optimize infrastructure.
- Participated in on-call rotations to respond to incidents and perform reg
- Organized and prioritized work to complete assignments in a timely, efficient manner.

PROJECTS

Monitoring Containers Resource Utilization For Remediation On Kubernetes	SEP 2021 - JULY 2022
MSIS.	<i>Manipal, Karnataka</i>

- Completed a project on Monitoring Containers Resource Utilization For Remediation On Kubernetes using Docker, Kubernetes, Prometheus and Grafana.

- Our idea here is to come up with an algorithm or script that would look at the part container resource utilization and recommend a proposed request and limits in the form of "Kubernetes Events" or "Prometheus Alerts".
- If these events or alerts are found to be true (without any false positives), this could trigger an Auto-Remediation Process that tunes the request and limit automatically. If the containers are frequently hitting OOM, automation could also take care of increasing the resource appropriately.

Lending And Borrowing App.

SSIT

SEP 2020 - MAR 2021

Tumkur, Karnataka

- Completed a project on developing an Lending And Borrowing App using Java, Firebase, Picasso.
- In which the application is developed to provide a useful and easy way to borrow without having to buy at the store.
- Or if you already have something, it's great way to lead and borrow the personal materials without any Mediator.
- And recognized as Best Project of an Android Application.

CERTIFICATIONS AND TECHNICAL COURSES

- Fundamentals of Red Hat Enterprise – (MAR'23)
- Introduction to DevOps By IBM Skills Network – (MAR'23)
- Jenkins Pipeline Certificate - (FEB'23)
- Introduction to Git and Github Certificate – (JAN'23)
- Git Training Certificate – (APR'22)
- Introduction to DevOps By IBM Skills Network – (FEB'22)
- AWS Foundation Graduate Certificate – (FEB'23)

PERSONAL SKILLS

- Strong communication skills with the ability to work effectively in a team environment.
- Highly motivated, adaptable, and eager to learn.
- Ability to handle multiple tasks and work under pressure.

LANGUAGES KNOWN

- English.
- Kannada.
- Telugu.
- Hindi.

DECLARATION

- I hereby declare that the information furnished above is true to the best of my knowledge.
