Ravali Burra

Mobile: +91-8309317550

Objective:

To work for an organization which provides scope to learn and contribute for the achievement of its goals and objectives.

Summary:

- Having around 3+years of IT experience, having good knowledge in Microsoft Power BI, SQL SERVER and Linux platform.
- Extracting the data from various data sources into Power BI desktop and transforming the data in Power Query Editor. Good experience on to creating Reports and Dashboards.
- I have good experience to implementing Calculated Columns and Measures using DAX like Aggregate, Filters and Time intelligence functions.
- Published power BI reports from the Power BI Desktop to Power BI Service.
- Explored data in a variety of ways and across multiple visualizations using Power BI. Strategic expertise in design of experiments, data collection, analysis and visualization.
- Expert in creating workspaces, Users and Groups assigning the permissions to End-Users and scheduling the Reports in Power BI Services.
- Works with the technical team to create database structure and queries. Design Key and Indexing schemes and design partitioning.
- Monitors database performance and tunes as needed, monitors database availability.

Technical Skills:

Reporting Tools	Microsoft Power BI
Operating Systems	Linux, Windows
Database	SQL Server, Excel
BI Skills	Power Pivot, Power Query, Maps, Power BI Services and DAX.
M S Office	Excel, Access, Power Point and Outlook.

Professional Experience:

- Currently working as, a Power BI developer at L&T (Mind tree) Business Services Bangalore, from March 2020 to till date.

Education Qualifications:

- 2019–MCA from OU.

Project #1:(Current project)

Project : Yale New Haven Hospital (Health care)

Client: Yale(USA)

Environment : Power BI

Role: Power BI Developer

Description:

Yale is one of the largest hospitals in the world and the largest in USA, Connecticut. It is the primary teaching hospital for [Yale School of Medicine](#) and Nursing. Yale is dedicated to offering quality medical care services to all patients with the use of leading-edge technologies, techniques, and treatments. Yale receives reimbursement through various Insurance payers which needs to be shown on the dashboard for the denial cost management where payer has partial or no payment. This would help Yale to understand the pattern and forecast the denied payment over a period a time.

Roles & Responsibilities:

- Involved discussion with business users for gathering the requirements and Driving daily call with clients and Translating End- User requirements into Efficient Dashboards.
- Responsible for understanding the business requirement for both technical and functional by going through the specifications and with inputs from business users and analysts.
- Creating, developing and deploying data reports and dashboards for large volumes of data in Power BI. Implement Row Level Security (RLS) as per requirement.
- Experience in creating different visualizations like Line, Bar, Histograms, Scatter Plot, Water Fall, Pie, Area, Donut Charts and Bullet Graph, Heat Maps Tree Maps etc.
- Designed different types of reports like Drill Down, Drill Through and Sync Slicers. Develop Visual Level Filters, Report Level Filters and Page Level Filters in Power BI.
- Created Book Mark Pane applies to the actions on view details and Text/ Matrix Tables.
- Testing in MySQL data base to write query to check the data is matching in Power BI desktop. Scheduled Automatic refresh and scheduling refresh in power bi service.
- Publishing reports to Power BI server and providing the access to required users.

Project #2:

Project : Consumer Marketing (Retail)

Client: Cuna(USA)

Environment : Power BI

Role: Power BI Developer and SQL-Server.

Description:

This project is a web application. The main aim is to improve the services of Customers and vendors. It maintains the details of customer payments, product receipts, addition of new customers, products and updating, deletion for the same. It also stores the details of invoices generated by customer and payments made by them with all Payments details like credit card. The primary features of the project entitled "Consumer Marketing" are high accuracy, design flexibility and easy availability. And, it uses database tables Representing entities and relationships between entities.

Roles & Responsibilities:

- Involved in database design, creating tables and maintaining the relationship between them. Extensively worked in data Extraction, Transformation and Loading (ETL) from source to target system.
- Trouble shooting, Performance Tuning of reports & resolving issues within Power BI.
- Extracted data from different sources into staging area then cleaned the data using appropriate business rules and load the information into Target tables.
- Extracting the data, the form various data sources into Power BI desktop and transforming the data in Power Query Editor.
- Creating interactions of Highlight Action, Filter Action, add interactivity to the visualizations. Building the relationship between tables by using Power Map.
- Developed analysis reports and visualization using DAX functions like Table function, aggregation function and Date and Time functions.
- Scheduled Automatic refresh and scheduling refresh in Power BI service.
