

Rohit Singh

Backend Java Developer

Experienced professional with a proven track record in Backend development. Highly motivated and results-driven, I bring 2.5+ years of expertise in Java, SpringBoot, and related technologies. Skilled in Java, Python, Spring, and Solr, I have a strong ability to do clean code. I excel in collaborative environments and thrive in challenging situations. Seeking to leverage my skills and experience to contribute to AudaxLabs.

PERSONAL PROJECTS

Data-Indexer (05/2023 - 07/2023)

- Data-Indexer is web application which help us to index and search in the heap of data.
- This project we present in internal hackathon in Audax labs and it brings us special acknowledgements.

Employee Management System (01/2022 - 02/2022)

- The objective of this project was to track data of employees in an organization by adding, updating, or deleting a profile.
- This web project was developed with Angular for front-end tech, Spring Boot for implementing REST and MySQL for database.

Audit Management System (07/2021 - 08/2021)

- This was the final team project assigned by Cognizant under training to manage and track audits of an employee of a company.
- Built using Java and Angular.

Hotel Management System (10/2020 - 11/2020)

- Built using Java, aimed to manage hotel guests' services.
