PROJECTS

Vocabulary Learning App

Tools: JAVA ,Android Studio , HTML , Machin Learning.etc

- ♦ The main goal of this project was to translate.
- ♦ One Language to another Language.
- ♦ Data in proper format and used some dataset in that.
- ♦ Vocabulary plays an important part in learning to read.
Beginning readers must use the words they hear orally to make sense of the words they see in print.

Bank Marketing Prediction

Tools: Python, Numpy, Pandas, Seaborn, Machine learning

JAVA | MYSQL

- ♦ The purpose of this project was to help the Banking business by predicting in advance whether the customerresponse. (subscribe) their campaign (Plan) positively or not based on the details of the customers.
- ♦ Analyzed the data, performed data preprocessing using feature React Js engineering techniques like RFE to eliminate redundant features and then trained multiple machine learning models from which Random forest was selected as the best model with accuracy around 83%.

Play Store Data Analysis

- ♦ Performed EDA on the data to understand & cleanup the data because dirty data will lead up to garbage analysis.
- ♦ There are some factors of app which led to popularity of app, one of is seen that most of heavier have highest rating.
