PROFESSIONAL EXPERIENCE

CAPGEMINI

Associate II-Software Engineer

Chennai, India

April 2023 - Present

Associate I-Software Engineer

January 2021 - March 2023

- Experienced Java Developer with a strong background in RESTful API design and proficiency in MongoDB, offering over 3 years of hands-on experience in crafting robust and efficient software solutions.
- Proficient in Agile practices, collaborating with 10–12 member teams.

PROJECT

Intelsat (Gogo) - Inflight entertainment and connectivity for commercial airlines

- Enhanced the Onboard Application using Java Spring Boot and MongoDB, delivering improved information to technicians and customers.
- Developed over 10 RESTful APIs for Tail information in the OTADS application, resulting in a significant 20% reduction in average resolution time.
- Utilized Back-End Java development and config JSON files to work on ESA (new airborne technology) and populate the system summary header status for different modules on the airborne maintenance page.
- Acted as a key contributor to unit testing, creating the JUnit and Spock frameworks for OTADS, achieving a notable 10% increase in test coverage.
- Decoupled airline-config generations in Golang, resulting in an impressive 30% reduction in build time.
- Designed a Groovy API for notifying Slack channels (external applications) about the permitted list.
- Managed the upgrade of Java 11 (JDK), Golang, Docker, Debian, and pipeline nodes for various components, leading to improved usability and a remarkable 50% reduction in runtime performance.
- Demonstrated leadership within a SAFe Agile development team, overseeing 8-10 members in each PI for on-time delivery of stories, Sprint planning, estimation, and playing a pivotal role in defining requirements and feature refinement.
- Automated Debian build generation using Python and Shell scripts through the Pipeline (CI/CD) feature.
- Orchestrated and delivered engaging onsite customer demos during meetings, ensuring the effective presentation of the latest features and functionality to guarantee customer satisfaction.
- Conducted rigorous code reviews for team peers, meticulously assessing code quality and adherence to coding standards, ensuring the software maintained high-quality standards.

SKILLS

- | | | |
|-------------------------|-------------------|-------------------|
| • Java (8/11) | • MongoDB (NoSQL) | • Shell Scripting |
| • Spring Boot framework | • MySQL | • Dockers |
| • Golang | • JUnit | • Debian |
| • Python | • Spock framework | |
| • Gradle | • Groovy | |

EDUCATION

- B.E. in Computer Science Engineering from Jeppiaar SRR, Anna University, Chennai with 72% (October 2020)

ADDITIONAL INFORMATION

- **Tools and Technologies:** Agile and scrum methodologies, Git, Postman, Heidi SQL, Jira, Jenkins, Spinnaker, AWS EC2, Artifactory, Confluence, Linux, IntelliJ IDEA, Visual Studio, Lucid Charts, Slack
- **Certifications:** Building Scalable Java Microservices with Spring Boot and Spring Cloud in Coursera (2023), Java Technology and Web Application Development (6 months) in Accord Info Matrix Pvt. Ltd (2020).
- **Awards:** GEM award for the year 2022 – 2023, Recognized under Kudos for Passion for Excellence in 2022.
