

Name: SHAIK MOHAMMAD GOUSE
Mobile: 9182808616
Mail ID: mohammadshaik0003@gmail.com

PROFESSIONAL SUMMARY

- Having 4+ years of experience in analysis, design and development of Data Warehousing applications using Business Intelligence tool Cognos (10.x/10.x.x/11.x) (Analytics, Dashboards, Framework Manager, Power Play Transformer, Cube Designer, Report Studio, Query Studio, Analysis Studio, Event Studio, Power Paly Studio, Business Insight & Advance, Workspace & Advance).
- Efficient and knowledge in relational model and dimensional model in Cognos **Framework manager**.
- Strong experience in creating **drill through, master detail, burst reports** using Report Studio.
- Strong experience in Cognos Project and **Reports migration** from Cognos 10.2.2 To CA 11.
- Skilled in developing complex reports in report studio using complex SQL queries.
- Well versed with complete Life Cycle Development process which includes Requirements.
- Strong knowledge on Data Warehousing, OLTP and OLAP concepts.
- Experienced in the COGNOS Administration like creating new Data Source Connections and Creating Packages, handling the Deployment of reports, copying from Development to Production server and also handling the user permissions on the Packages and Folders.
- Creation of user security groups, roles and permissions and providing domain and portal accesses to various users through service requests.
- Experience in Cognos UI customization and developed new themes for Cognos UI.
- Strong experience on Scheduling in Cognos, Deployment, Bursting, user/role management and data source connection management.
- Excellent problem-solving skills with strong technical background and good inter-personal skills. Quick learner and excellent team player, ability to meet deadlines and work under pressure.
- Flexible to adapt to any type of new environment with a strong desire to keep pace with latest technologies. Also, a Quick learner, highly motivated with positive attitude, and active personality with ability to plan and accomplish goals.

EDUCATION QUALIFICATION

BTech in Computer Science from PBR VITS Collage of Engineering affiliated by JNTUA, Ananthapur

PROFESSIONA EXPERIENCE

Working as a Senior Software Engineer in **Wipro Technologies**, Since July 2022 to till now. Worked as senior software Engineer in **HCL Technologies** from May 2021 to April 2022 and worked as a Software Engineer in **Tech Mahindra** from June 2019 to May 2021.

TECHNICAL SUMMARY

BI Tools:	IBM Cognos 10.1, 10.2.1, 10.2.2 & Cognos Analytics 11.x.x suite, IBM Cognos Connection, Report Studio, Query Studio, Analysis Studio, Event Studio, Work Space and Dashboard.
Meta Data modelling Tools:	Cognos Framework Manager, Data Module (Star & Snowflake Schema), IBM Cognos Cube Designer and IBM Cognos Transformer.
ETL Tools:	Informatica, Data Stage and ODI
Operating Systems:	Windows Server /2000 / 2012/XP/7 and UNIX.
Databases:	Netezza, DB2, SQL Server, Oracle

PROJECT PROFILE

Project: Alight Solution

Role: Cognos Consultant

Technologies: Cognos 10.2.2 BI, Cognos Analytics 11.1.7, DB2

Project Description:

Alight Solution is an Information technology and consultant company based in Lincolnshire, The company provides cloud-based digital business and human capital service solution particularly with in the areas of Wealth, Health and wellbeing decisions for 36 million people and dependents. Our alight work life platform combines data analytics with a simple, seamless user experience. Supported by our global delivery capabilities, Alight Work life is transforming the employee experience for people around the world Personalized, data-driven health, wealth, pay and wellbeing insight.

Role & Responsibilities:

- Understanding the business process for Implementing Models in Framework Manager.
- Creating prompts, filters, calculations and providing Security in Framework Manager Level.
- Creating the query subjects and publishing the packages to report server.
- Created the Cubes using the Power play transformer.
- Created dashboards to present critical data in a single report
- Creating adhoc reports by using DB2, Cognos report studio, analysis studio and Query studio on data mart wise.
- Worked on performance tuning of slowly running Reports/Dashboards
- Created adhoc reports using analysis studio and Report studio, scheduled them and shared the data with the business
- Supporting business on Adhoc related queries
- Ability to deliver the Adhoc requests within the given timelines.
- Issues during the migration process were resolved proactively

- Responsible for data checking in the report and fixing data issues in anything found.
- Proactively resolved all the issues with the reports, SQL queries during migration process
- Extensively worked on performance improvement of the reports
- Analysing existing report structure and redesign the report structure by applying additional optimization techniques
- Moved Dimensionally modelled reports to relational modelling in order to improve the performance
- Reduced the number of queries wherever possible
- Used customized SQL queries to bypass the FM model
- Optimized SQL based Cognos Reports
- Testing reports performance with manual SQL queries
- Set governors at FM level as required
- Fully automated Reports using Cognos and DB2 which were running by the team manually on monthly basis
- Automated many SQL based and Cognos reports and scheduled to run on certain timeframes.
- Created complex reports using Query studio and Report Studio.
- Generated various reports including List, Cross tab with nested, Chart.
- Created various prompts, filters, data items according to the report specifications.
- Created Grouping, Sorting and Sections.
- Created Cascading prompts, Drill-Through to create efficient reports.
- Created layout and Query Calculations.
- Developed Reports with Conditional formatting to highlight the data.
- Developed Reports using Conditional Block, String variable.

Project: United Overseas Bank (UOB)

Role: Cognos Developer

Technologies: Cognos 10.2.2 BI, Cognos Analytics11.0.x, SQL Server 2017.

Project Description:

United Overseas Bank provide commercial and corporate banking services, personal financial services, private banking and asset management services, as well as corporate Finance, venture capital, investments and insurance services. It has 68 branches in Singapore and a network of more than 500 offices in 19 countries and territories in Asia Pacific, Western Europe and North American.

The main objective of the project is the Platforms support maintenance in a Prod-server includes design, implementation, configuration and Operations of technologies like IBM Cognos, Tableau and IBM Watson.

Role & Responsibilities:

- Involved in requirement analysis for various new requirements raised by business and provided technical guidance understanding the in-depth of the system.
- Implemented advanced featured in creating Report Studio, Analysis Studio, Query Studio following report design standards and best practices
- Designing Reports using Advanced reporting features of Cognos Report Studio like Master-

Detail, Drill through, Rendering, Calculations, Filters and using different multi-dimensional functions

- Created Master and Detail Reports Used conditional hiding of objects with conditional rendering
- Created adhoc reports using analysis studio and Report studio, scheduled them and shared the data with SAS Developers
- Developed the Complex Reports by using Conditional blocks and variables in Report Studio.
- Worked on modeling the metadata extracted from multiple databases and established joins and cardinality to meet the business needs.
- Created security filters at the Framework level to restrict data access.
- Developed list reports, crosstab reports and chart reports using report studio.
- Customized data by adding Filters, prompts, Calculations, Summaries and Functions using Cognos 10 Report studio, scheduling report on Cognos Connection.
- Developed Standard Reports, Charts, Drill Through Reports, and Bursting Reports Using Report Studio.
- Created Grouping, Sorting, Sections and master relationship for lists.
- Hide and Show the objects by using conditional blocks and conditional variables.
- Developed multi format reports (PDF, HTML and Excel).
- Involved in Data Validation, Unit testing and Performance testing of the reports with MS SQL Server.
- Dynamically Changed the dimensions and measures in report objects
- Created Test Queries and Performed Unit Testing by validating reports data in database
- Reports deployment to UAT and Production environment were done
- Created project and training documents. Involved in creating technical design and code review.
- Performed various Admin part like Cognos security and troubleshooting...etc.
- Responsible for trouble shooting and fixing various critical issues during pre and post production phase.
- Working on report enhancements and troubleshooting the issues at report level.
- Reviewing and fixing the Report level issues, pertaining to Development or Administration.
- Set user and role-based security at reports, package and folders levels.
- Successfully designed and implemented security on different levels including object and row level security
- Developed the Complex Reports by using Conditional blocks and variables in Report Studio.
- Developed Reports by using SQL Queries.
- Worked on conditional formatting by creating variables and applied conditional styles.
- Strong troubleshooting and production Support skills and coordination/ interaction abilities with end users.
- Provided production support for existing Reports. Users requested certain minor changes to formatting and calculations in reports.

Project: Nationwide Insurance, Columbus, OH

Role: Cognos Support Analyst

Technologies: Cognos 10.1.1, Oracle11g

Project Description:

Nationwide, a Fortune 100 company based in Columbus, Ohio, is one of the largest and strongest diversified Insurance and financial services organizations in the U.S. and is rated A+ by both A.M. Best and Standard Poor's. The company provides a full range of insurance and financial services, including auto, commercial, Homeowners, farm and life insurance, public and private sector Retirement plans annuities and mutual funds, Banking and mortgages, motorcycle and boat insurance's

Role & Responsibilities:

- Understand the Business Process in North America region of Merck.
- Analysis of Business needs and Requirement analysis for GPRM Program.
- Client interaction to understand the business to provide proactive solutions for the requirements.
- Stringent SDLC process execution and Documentation (SOP, UTC, Code review checklist, Design document, FM-design document, Installation testing script document).
- Creation of all kinds of Tickets right from Project creation to final deployment of project.
- Communicating with the database developers and other personnel involved in the process to ensure smooth flow of the project.
- Involved with business and functional people to collect and gather requirements.
- Developed Mock report layouts before the actual report implementation.
- Designed the objects in Framework model according to the business requirements for the entire system.
- Created List and Nested list reports, charts reports, sectional reports, & Drill through reports by using Report studio.
- Created value prompts, Date calendar prompts, Search & Select prompts, cascading prompts.
- Created Grouping, Sorting, Sections and master relationship for lists.
- Developed Mock report layouts before the actual report implementation.
- Hide and Show the objects by using conditional blocks and conditional variables.
- Implemented java script for the prompts behaviour in reports.
- Developed multi format reports (PDF, HTML and Excel).
- Involved in Data Validation, Unit testing and Performance testing of the reports with Oracle DB.
- Creating & publishing the packages according to the business requirements.
- Prepared training documentation and helped Business Users related to Cognos Reports.
- Expertise in handling Administration tasks like bursting and scheduling the reports.
- Responsible for knowledge transfer, training and communication with the vendor, end users and team members.
