Master of Technology

Manipal Institute of Technology

10/2021 - 08/2023

Manipal, 8.41

Courses

▣ Computer science

Bachelor of Engineering

Jyothy Institute of Technology

08/2017 - 08/2021

Bangalore, 7.53

Courses

▣ Information Science

Pre University College

N.M.K.R.V PU college

07/2015 - 07/2017

Bangalore, 54.16

Secondary School Leaving Certificate

Nirmala Girls High School

03/2014 - 04/2015

Sagar, 84.96

WORK EXPERIENCE

Worked as an Intern In Danaher IDBS as Full Stack Developer (08/2022 - 07/2023)

During my internship at IDBS, I had the dual role of a full-stack developer and automation engineer using the Robot Framework. As a full-stack developer, I worked with Angular for frontend development and Java for backend tasks, contributing to the creation of dynamic web applications. Additionally, I embraced the power of the Robot Framework for automation, developing test cases and robotic process automation scripts that streamlined testing processes and increased overall efficiency. This experience allowed me to gain valuable insights into both development and automation, making my internship at IDBS a valuable and enriching learning opportunity.

PROJECTS

Employee Management System

Early Prediction Of Lethal Infectious Diseases Using Machine And Deep Learning Approaches- Final B.E project

Face detection using machine learning

Image Classification using machine learning and deep learning model
