- Experienced in validating **Response Time** with **HAMCREST Matchers**.
- Logged defects and followed up till the closure.
- Flexible and versatile to adopt to any new environment, ability to work independently with minimum supervision and also performed as part of a team and good communication skills.

PROJECT INVOLVED:

Project Title: Vendee Correspondence Management Services

Domain: CRM

Duration: 1.4 years

Role: Software Engineer

Process: Agile Methodology

Description: Vendee Correspondence Management Services is a technology for managing all the company's relationships and interactions with customers and potential customers. The goal is simple: Improve business relationships. This system helps the company stay connected to customers, streamline processes, and improve profitability.

Project Title: BT

Domain: E-commerce

Duration: 1.10 years

Role: QA Engineer

Process: Agile Methodology

Description: BT (British Telecommunication) is broadband and mobile services in UK, BT took over EE which is a mobile network operator and internet service provider. The goal was to merge both their data bases and create a single website for the customers with branding being different.

Roles and Responsibilities:

- Whenever we got manual test case from the manual team, our team lead was going to allocate test case to us.
- When test case is allocated, we do execute the test manually to understand the business flow of the application, if test case is not clear talk to author/team lead & get the clarity.
- Involved in developing Test Scripts.
- Involved in executing Automation Test Script
- Before test script development, I would get the latest framework from the Git Repository.
- Used Maven as Build Management Tool to build and manage my framework and also plugins for invoking XML files.
- Involved in adding elements into the repository.
- Involved in Reviewing the Test Scripts.

- Involved in Stand-Up Meeting.
- Involved in Debugging the Test Scripts and raise regression defect if test failed because of Product issue or else fix the test scripts.
- Involved in creation of WebDriver actions for element in GUI like Select, mouseOverOnElement(), switchToWindow() etc.,
- Involved in tracking automation defect in Jira.
- Involved in verifying execution reports, when Jenkins send out execution report.
- Experienced in handling OAuth 2.0 Authentication.
- Experienced in performing CRUD operations using RESTASSURED.
- Performed response Time Validation using HAMCREST Matchers.
- Experienced in performing Request Chaining using RESTASSURED.

EDUCATION QUALIFICATION:

Completed **B.E.**, in **Electronics and Communication** from **VTU**.

DECLARATION:

I hereby declare that the information given in this form is true to the best of my knowledge and belief.
