- Having 4.8 years of IT experience, including 4 years in Cloud and Jenkins DevOps.
- I have expertise in setting up and maintaining CI & CD pipelines for multiple applications on Linux-based distributed Tomcat Application Server, Maven infrastructure.
- I have extensive experience with version control systems like GIT and AWS cloud services such as EC2, VPC, Cloud Terraform Watch, S3, ASG, ELB, RDS, IAM, and Cloud Trail.
- I have over 3 years Docker, Kubernetes, of experience with monitoring tools like Prometheus and Grafana, SonarQube .
- I am skilled in using automation tools like Jenkins for end-to- end automation.
- I have experience with build tools like Maven, unit Ansible, Ansible Tower tests, and code quality analysis tools like SonarQube.
- I am AWS Cloudformation, Lambda, proficient in deploying applications to production and non- IAM, S3 production servers using Ansible and have hands-on experience AWS

Work Experience

DevOps Engineer

Cognizer

September 2023 to October 2023

DevOps Engineer

Nexxoft Infotel India pvt ltd - India

February 2019 to August 2023

4 years of experience in terraform

Build/Release/Software Configuration

and DevOps methodologies and continuous integration setting up and maintaining CI & CD pipelines and delivering releases for

prometheus multiple Applications running on both Linux based distributed Infrastructure.

- Experienced in sonarqube working on DevOps operations process and tools.
- Extensively nexus worked with Version Control Systems like GIT.
- Extensively worked with Application Deployment automation tools like Jenkins to implement the end-to-end automation.
- Expertise in using AWS VPC build tools like MAVEN for the building of deployable artifacts such as Shell Scripting War&Ear from source code.-Experience in integrating Unit Tests and Code Quality Analysis Tools like SonarQube. creation of Individual Jenkins jobs, including automatic generation, reporting and alerting of build failures and build status indicators.
- Performing deployments to Prod and Non-Prod Servers using Ansible.
- Experience in using Nexus, Jfrog Repository Manager for Maven builds.
- Administered and Implemented CI tools Hudson and Status Jenkins for automated builds.
- Experience is using Tomcat, Jboss/Wildfly application servers for deployments.
- Application Deployments & Environment configuration using Ansible.
- Experience with Linux/Unix environments and scripting for Build& Release automation.

- Good Experience in Docker like creating Docker Images and Docker Containers.
- Experience in creating Pods in Kubernetes by writing YAML manifests.
- Experience in different services of AWS like VPC, IAM, EC2, ELB, S3.
- Experience in Shell Scripting.

Education

B.Tech/B.E.

2018

Skills / IT Skills

- Bash Scripting, Shell Scripting With 4.8 years of IT experience, including 4 years in Cloud and Jenkins DevOps, I have expertise in setting up and maintaining CI & CD pipelines for multiple applications on Linux-based distributed Tomcat Application Server, Maven infrastructure.
