Professional Summary:

- A competent professional with close to 3 years of experience in Automation Testing.
- Strong understanding on **Automation Script Writing, Code Analysis and Code Debugging**.
- Strong understanding in **Deployment** and **Application Release** Process.
- Extensive Working experience in **Test Complete, Selenium**.
- Extensive experience in **Smoke Testing, Functional Testing, Regression Testing**.
- Extensive experience in **UI Automation** in **Web based Application**.
- Good experience in development of **Test Scenarios**.
- Implemented the idea of reduction of test script execution time.
- Part of review and reconciliation of test cases to reduce execution time.
- Worked on new **automation framework designing**.
- Working on Agile methodology.
- Prepared Weekly Status Report.
- Participate in scrum meeting to discuss about project progress report every day.
- Knowledge of big data technologies **Hadoop, Sqoop, Hive and Spark**.
- Good team working skills coupled with initiatives.
- Excellent written and verbal communication skills that has been put to use to understand client's business requirements and converting the same into systems fulfilling business needs.

Professional Experience:

Company name	From	To	Designation
NOUS Info Systems	Jun 2021	Till now	Test Automation Engineer
Exalca Software Solutions	Mar 2020	Mar 2021	SAP Dev/Tester Intern
nuVizz Software Solutions	May 2018	July 2018	Dev/Tester Intern

Technical Skill-set:

Computer Languages	Java, Selenium, Python, VBscript and ABAP
Automated Testing Tools	Test-Complete, Eclipse and BitBar
Database	MYSQL
Web Technologies	HTML and XML
Bug Tracking Tools	JIRA
OS	Windows (7,10 &11) and Linux Centos

Project Details

Project #1: Littler

Project Description

Littler is a U.S.-based, largest global employment and labor law practice, representing management in all aspects of employment and labor law and serving as a single-source solution provider to the global employer community. Consistently recognized in the industry as a leading and innovative law practice, they also support global mobility and immigration issues.

Domain: Law Firm.

Responsibilities:

- Understanding requirements, flow and functionality of the application.
- Involved in development of Automation script.
- Involved in execution, debugging and merging of Automation script.
- Identification of defects, registering them in JIRA and reporting them to the onsite lead.
- Performing Functional Testing, Smoke Testing, Regression Testing and Re-Testing and Compatibility Testing.
- Identify the test cases for Automation and reviewing the automation script.
- Participated in Test Plan and Estimation of test cases.

Technologies Used:

- **Technology** : VB script and shell script
- **Testing Approach** : Automation Testing
- **Tools** : SmartBear TestComplete, Bitbar, JIRA and Octopus
- **Role** : Testing Engineer
- **Duration** : Jun 2021 to Till Now
- **Team Size** : 5
- **Organization** : Nous

Project #2: Bridgestone

Project Description

The Bridgestone SAP MDM project aims to centralize and streamline master data management processes across the organization to improve data consistency, accuracy, and accessibility.

Domain: Tyre and rubber manufacturing company.

Responsibilities:

- Collaborated with stakeholders to understand user requirements and design intuitive and user-friendly interfaces for accessing and managing master data within the SAP MDM system.

- Involved in SAP's WebDynpro development framework to create custom applications and user interfaces tailored to the organization's MDM needs.
- Conducted testing and debugging of WebDynpro applications, identifying and resolving issues to ensure quality and reliability.
- Participated in team meetings, contributed ideas, and collaborated with team members to achieve project objectives.

Technologies Used:

- **Technology** : ABAP, Selenium and Java
- **Testing Approach** : Automation Testing
- **Tools** : SAP Webdynpro and Eclipse
- **Role** : MDM Webdynpro ABAP Dev/Tester Intern
- **Duration** : Mar 2020 to Mar 2021
- **Team Size** :3
- **Organization** : Exalca

Project #3: Nutan

Project Description

The In-house Build Automation Tool project aims to develop and implement a customized software solution to automate the build and maintenance processes for the physical data warehouse within the organization. By leveraging automation, the project seeks to streamline data ingestion, transformation, and loading (ETL) processes, enhance data quality and consistency, and reduce manual effort and errors associated with traditional manual data warehouse management.

Responsibilities:

- Prepared documentation, such as user stories, use cases, and process flows, to capture requirements and specifications for the automation tool.
- Participated in software development tasks under the guidance of senior developers.
- Contributed to coding, testing, debugging, and documentation of software modules and components.
- Involved in creation of test cases, executing tests, and documenting test results for the automation tool.
- Collaborated with team members, including developers, testers, project managers, and stakeholders, to ensure effective communication and coordination.

Technologies Used:

- **Technology** : Selenium and Java
- **Testing Approach** : Automation/Manual Testing
- **Tools** : Wireframe, Jira
- **Role** : Dev/Testing Engineer Intern
- **Duration** : May 2018 to July 2018

- **Team Size** :3
- **Organization** : Nuvizz

Educational Qualification:

- ❖ KGISL INSTITUTE OF TECHNOLOGY - Coimbatore
 - **B.E Computer Science and Engineering:** July 2016 - Sept 2020 with CGPA 7.01
- ❖ CARMEL GARDEN MATRICULATION HR.SEC. SCHOOL - Coimbatore
 - **HSC:** Year of passing 2016 with 74.08%
 - **SSLC:** Year of passing 2014 with 91.2%

Personal Details:

Date of Birth	16 December 1998
Nationality	Indian
Gender	Male
Languages Known	English and Tamil

Declaration:

I hereby declare that the information given above is true to the best of my knowledge.
