

Sanju Srivasthav Batta

Data Engineer | Avasoft

+91 8106914490 | sanjusrivasthav@gmail.com | Chennai | <https://www.linkedin.com/in/sanju-srivasthav-batta-321b6a282>

Professional Summary

Goal-oriented Data Engineer with 2+ years of experience working with business stakeholders to troubleshoot and optimize databases using advanced technologies like data infrastructure, data pipelines and data modeling. Equally confident working independently and collaboratively as needed and utilizing excellent communication skills.

Technical Skills

- **Tools:** SQL Developer, DBeaver, Pg admin, SSMS, SSIS
- **Database:** Oracle (19c), MSSQL, PostgreSQL, MYSQL
- **Cloud Technologies:** Amazon services like RDS, DMS, S3
- **DevOps:** GIT, Gitlab
- **Project Management:** JIRA

Education

Amrita Vishwa Vidyapeetham

B Tech | Electrical and Electronics Engineering | July 2016 – July 2020

Publications

Fuzzy/Neural Network based approach to enhance the performance of Electric Vehicle by effective utilization of Battery/Supercapacitor International Journal of Advanced Science and Technology (IJAST)

Achievements

Vice Chairperson of IEEE PES | Head of Amrita Science fests

Core Qualifications

Risk Analysis | Adaptability | Problem Articulation | Data Ethics and Privacy | Data visualization | Data Analysis | ETL development | Data security management

Experience

DATA ENGINEER | Mar 2021 – Current

- Designing, developing, and maintaining scalable and efficient data pipelines to extract, transform, and load (ETL) data from various sources into data storage systems. This includes integrating data from different databases, files, and streaming sources.
- Identifying and optimizing performance bottlenecks in data processing and data retrieval processes. Tuning database queries, optimizing data storage, and implementing caching and indexing strategies to improve overall system performance.
- Built scalable and cost-effective data processing solutions utilizing cloud computing platforms like AWS and big data technologies.
- Collaborating with cross-functional teams, including application developers, and stakeholders, to understand their requirements and translate them into practical data engineering solutions. Effectively communicating complex technical concepts to non-technical stakeholders.

DATABASE ADMINISTRATOR | Mar 2021 – Sep 2021

- Responsible for Installing and configuring database management systems (DBMS) such as Oracle, MySQL, Microsoft SQL Server, or PostgreSQL includes setting up database instances, configuring parameters, and optimizing performance.
- Collaborating with application developers and stakeholders to design and plan database structures that meet business requirements involving in creating tables, defining relationships, and establishing data integrity constraints.
- Worked with team to maintain database security measures to protect sensitive data from unauthorized access or breaches and setting up user accounts, access control, implementing encryption mechanisms
- Involved in Database Maintenance and Upgrades such as database optimization, space management, index rebuilds, patch installations, and version migrations
