Education

Government College of Engineering, Salem

B.E., in Computer Science and Engineering

Course Work: Web Development, Programming in Java, Object-Oriented Programming (OOPS),
Data Structures and Algorithms

Jun 2018-Apr 2022

CGPA : 9.55

Experience

Checktronix India Private Limited

Jul. 2022 - Present

Software Engineer

Java, SpringBoot, Python, React, NextJs, AWS, Git, Gitlab, SQL, Confluence, Jira

- Re-framed the existing application from Monolithic to Microservices architecture using Spring Boot
- Restructured the Intra-Communication between the Microservices with Eureka Discovery Client and Feign Client, replacing the legacy Rest Template, thereby increasing the load balancing efficiency
- Developed the responsive front end using ReactJs and NextJs with OAuth 2.0 Authentication for accessing the REST APIs
- Tested the entire service using Junit and Mockito with a coverage of 85 Percentage
- Developed the CI with Gitlab and deployed the application in AWS using Loadbalancer and Auto-Scaling thereby increasing the scalability of the application based on the input traffic
- Improved the response time of the crawling APIs by replacing the single-threaded architecture to multi-threaded architecture in Python
- Reduced the cost of the S3 bucket storage by moving the legacy files older than 90 days to S3 Glacier Deep Archive and automated the event by using AWS Lambda functions and boto3 libraries
- Replaced the legacy Snowflake writes with CSV writes and Snowflake Stages thereby reducing the time to load large amounts of data into the Snowflake warehouse

Checktronix India Private Limited

Feb. 2022 - Jul. 2022

Software Developer Intern

Python, Git, Snowflake, Metabase

- Parsed the Lens Search API logs and created an interactive visual dashboard using Metabase, thereby storing the data in Snowflake for analysing the customer search patterns and usage.

Guvi Geeks Private Limited

Dec. 2021 - Feb. 2022

Technical Support Engineer Intern

HTML, CSS, JavaScript, React

- Mentored students on the advanced concepts of Javascript and solved more than 250+ queries with four-star ratings on an average scale

Projects

E-commerce web app for Visually Impaired using Voice Integration *HTML, CSS, Javascript, Bootstrap, PHP, MySQL*

- Developed an end-to-end E-commerce application for the visually impaired that supports Voice integration with Alan AI APIs
- Enables the user to log in, sign up, add or delete items, view the cart, and generate the bill with complete voice integration

Skills

Languages:

Java, Python, SQL, HTML, JavaScript

Frameworks & Tools:

SpringMVC, SpringBoot, SpringCloud, SpringData JPA, AWS, Git, Gitlab, Snowflake, Metabase, CI/CD

Certifications:

Data Structures and Algorithms by Geeks for Geeks.

Programming in C++ by IIT Madras via NPTEL with Elite Silver Medal

Programming in Java by IIT Kharagpur via NPTEL with Elite Gold Medal

Web Development course from Internshala
