Saurabh Jain

IT Service Management Professional  
(Smart Metering, AMI, HES, MDM)

## SUMMARY

**ITIL V3** certified IT Service Management professional with **10+ years** of experience. Specialized in **IT, Smart Metering** (IoT devices), Energy Utilities, Service Delivery, and Service Operation. Proficient in managing cross-functional delivery teams, fostering effective collaboration between executives and technology teams. Adept at analyzing process efficiency, implementing improvements, and contributing to the development of **KPIs**.

## PROFESSIONAL EXPERIENCE

### Service Assurance Lead Secure Meters Ltd

Apr-2018 - Present  
Udaipur

- Leading the execution of diverse projects, notably overseeing the successful execution of **AMISP & MBC** initiatives in India
- Overseeing the end-to-end **System Integration** for the AMISP service solution, encompassing vital applications **HES, MDM, and Middleware**
- Work closely with process experts to translate intricate client requirements into streamlined and efficient system-supported processes
- Driving successful integration of **Advanced Metering Infrastructure (AMI)** solutions by closely collaborating with cross-functional teams
- Oversee troubleshooting activities for different applications, conducting **RCA** and developing **SOPs** to elevate service quality
- Actively pursue and exploit opportunities to improve timelines, precision in **Operations & Maintenance (O&M)**, and other support activities
- Execute comprehensive end-to-end **User Acceptance Testing (UAT)** for all interfaces, deliver impactful training sessions, and demonstrations
- Participate in the planning, validation, design, & implementation of **AMI** systems, applications, infrastructure and operations
- Take on the Lead Analyst role for **Smart Metering Business Solutions** in the UK, fostering connections with more than **30+** energy utilities.
- Define, implement, and estimate tasks, ensuring their timely execution in accordance with **Service Level Agreements (SLA)**
- Prepare and track various sub-project plans, such as Project Schedule, Release, Issue log, Risk Management, and Resource Management plans

### Change Management Analyst IBM India Pvt. Ltd.

Jan-2016 - Apr-2018  
Gurgaon

- Reviewed change requests, decisively approving or rejecting them in line with established **Change Management** processes.
- Conducted thorough analysis of change requests, ensuring all essential data was present before their distribution for further processing
- Actively brought up and monitored conflicts and concerns pertaining to Change Management, helping to facilitate efficient issue resolution
- Collaborated with cross-functional teams to ensure seamless coordination throughout the change management process
- Conducted comprehensive reviews of all implemented changes, verifying their alignment with predefined objectives and performance metrics
- Actively participated in process improvement activities, engaging in discussions, brainstorming sessions for enhancing overall efficiency

### Sr. Practitioner (Incident Management) IBM India Pvt. Ltd.

Jan-2014 - Dec-2015  
Gurgaon

- Provided crucial support to the **Incident Management** team, ensuring optimal team performance & the attainment of performance targets
- Managed critical incidents by delivering timely workarounds within the designated **SLA** to effectively minimize downtime
- Enforced **ITIL** protocols for efficient service delivery and timely service restoration in line with agreed SLA
- Successfully resolved **98%** of tickets without the need for escalation to the next level, showcasing a strong expertise in incident resolution
- Played a key role in **Problem Management** by creating problem tickets & efficiently assigning them to the problem management team for **RCA**
- Monitored critical tickets, proactively preventing potential outages, and ensured the prompt involvement of the appropriate technical team

### Practitioner (Technical Support) IBM Daksh

Oct-2013 - Dec-2013  
Gurgaon

- Provided **24/7** service and support to enterprise users via helpdesk dashboard, email, or phone
- Diagnosed and resolved **50+** H/W & S/W issues per week including internet connectivity, email clients, and other application issues
- Escalated issues to the proper help desk associate when necessary and followed up on any escalated issues, all within a timely manner
- Engaged extensively with client and customers, facilitating impactful information exchange and streamlined process management
- Achieved **100%** customer satisfaction with timely follow-ups for their issues
