

Saurabh R Sharma

Software Engineer

Pune, Maharashtra • +91 8380 809932 • sharmasaurabh56838@gmail.com • <https://linkedin.com/in/saurabh56838>

SUMMARY: Software engineer with one years' experience implementing backend systems in Java; led architecture platform that serves 100,000+ requests per month. Passionate to work in an organization where culture of freedom is ensured, facilitating my contribution through creative thoughts and action to company's vision and thus achieve self-development by playing significant role in building the organization for future development.

WORK EXPERIENCE

Capgemini, Pune – India

May 2022 – May 2023

Software Engineer (1.1 Years' Experience)

CRM System for Vanguard - Is a renowned investment management firm recognized for its index and mutual funds, providing diverse financial services and products to a global clientele. With a steadfast commitment to cost-effective investing, Vanguard has solidified its position as a prominent player in the financial industry.

- Designed and implemented the architectural framework using Java and JavaScript ensuring maintainability and extensibility.
- Collaborated with clients through daily stand-up meetings, addressing new application requirements.
- Designed solution concepts, gathered client requirements, and performed impact analysis.
- Implemented a RESTful API architecture in Java and PL/SQL for seamless communication between the UI and the backend database.
- Integrated external services such as AWS for deployment and Docker for containerization, optimizing the application's scalability and management.

Contracting Cockpit (Coco) for ALDI – one of the largest retail companies and supermarket chains in Europe. CoCo facilitates contract creation for vendors within the supply chain by capturing concise details on pricing, orders, distribution, and purchases.

- Developed and maintained Java applications, ensuring timely project delivery.
- Improved application performance by optimizing and refactoring Java code, resulting in reduced execution times and resource utilization.
- Played a pivotal role in enterprise releases and delivered minor releases from the Java backend.
- Supported production deployments and collaborated directly with clients to replicate defects.
- Contributed to End-To-End Java backend deployment.
- Collaborated with cross-functional teams, SAPUI5 front-end developers and QA engineers to deliver cohesive and user-friendly software products.
