Project Details

Project Name: Trade.com

Domain: Investment Banking

Client: Livemarkets Limited, Cyprus

Description:

Trade.com is a multi-asset brokerage offering over 100,000 instruments on the MetaTrader 4 and WebTrader platforms. Instruments available include forex pairs, CFDs, commodities, stocks, and cryptos. This review looks at the login process, available spreads, fees and payments. Trade.com offers several additional features to enhance the trading experience. The free tools are excellent resources for beginners, in particular, who can use the services to refine strategies and validate market outlooks. Experienced investors can also use the powerful tools to get additional market insights and perform detailed technical analysis. Trade.com is regulated by reputable bodies, including the FCA, and has implemented an investor compensation fund policy that should give traders' confidence when deciding between brokers. Additionally, the broker uses the MT4 platform which offers strong user protection with additional security measures at login.

Responsibilities:

- Responsible for gathering test execution data on daily basis and sending mail to Team.
- Responsible for getting clarification from the Development Team regarding defects.
- Performed Root cause analysis of all defect
- Responsible for sending progress reports on the weekly basis and resolving technical issues.
- Responsible for providing Regression Test case Estimation for various customer requests.
- Performing Functional Testing and Regression Testing., Globalization Testing, Cross Browser Testing, API Testing and Automation Testing using Selenium WebDriver with JAVA.
- Identifying test cases for Regression Suite and updating the script accordingly.
- Developing POM classes and Test classes.
- Involved in the peer review of the script and presenting demo to the client.
- Used existing Data Driven Framework for the test script execution.
