EXPERIENCE

2019 - Present

Pune, India

Maharashtra Knowledge Corporation Limited (MKCL)

Member of Technical Development Staff

- Collaborated with clients to gather project requirements, analyzed requirements, performed data modeling, created and maintained technical documentation throughout the development lifecycle.
- Developed and maintained full-stack web applications using Java, Spring MVC, Spring Boot, Golang, and Vue.js.
- Designed and optimized server-side logic, databases, and APIs for seamless front-end and back-end integration.
- Contributed to architectural discussions, ensuring scalable and maintainable software solutions aligned with business needs.
- Managed relational databases, wrote complex queries, and optimized database performance for efficient data management.
- Designed, documented, and implemented RESTful APIs to enable effective communication between application components.
- Conducted and participated in code reviews, ensuring code quality and knowledge sharing.
- Collaborated closely with cross-functional teams, translating project requirements into technical solutions, analyzed complex problems and applied best practices.
- Provided mentorship to junior developers, fostering their growth within the development team.
- Managed source code using Git and SVN for version control, enabling efficient collaboration and tracking of changes.
- Proficient in identifying performance bottlenecks and optimizing application performance to enhance overall operational efficiency.

EDUCATION

2015 - 2019

B.E in Computer Science and Engineering

Rungta Engineering College, Bhilai, Chhattisgarh

ACHIEVEMENTS

Certificate of Appreciation (March 2020)

Recognized for exceptional contributions during the rapid application development of the IDSP for Pune District during the COVID outbreak in India.

GitLab Certified Associate Badge

Skilled in version control, collaborative development, and Git fundamentals. Committed to enhancing software practices and team efficiency.
