WORK EXPERIENCE

Java Developer

Xapotech System Pvt Ltd

09/2021 - Present

Achievements/Tasks

- Developed and implemented backend APIs using Spring Boot, ensuring seamless communication between the front end and database.
- Utilized Hibernate/JPA for efficient and reliable data persistence in MySQL, optimizing database management processes.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and enhance system functionalities.
- Spearheaded the design and implementation of backend APIs, leveraging Spring Boot for rapid development and scalability.
- Played a key role in project planning, contributing technical expertise to ensure successful delivery within specified timelines.

SKILLS

Java Spring Boot Hibernate / JPA MySQL

OOPS MVC Git / GitHub JUnit

Tools- Postman, Eclipse, STS

PROJECTS

HyperERP

- Spearheaded the development of the HyperERP project, a store management system.
 - Designed RESTful APIs for Master, Purchase, Sale, and Inventory modules optimizing functionality.
 - Established and maintained a robust database architecture using MySQL, optimizing query performance and ensuring data integrity.
 - Identify and resolve any technical issues arising Identify and resolve any technical issues arising.
- Technologies used: Java, Spring Boot, Hibernate/JPA, MYSQL

HyperHR

- Spearheaded the development of the HyperHR project, an integrated HR management system encompassing modules such as Employee, Master, Attendance, Salary, and Report.
 - Utilized Spring Boot, and Hibernate/JPA to create a robust backend API for efficient data management.
 - Implemented complex business logic within the modules to enhance the system's capabilities in tracking employee data, managing attendance, and facilitating salary processing.
 - Designed and maintained the relational database to store employee information, attendance records, and salary details.
 - Implemented comprehensive testing strategies using JUnit to ensure the reliability and accuracy of the HR management system.
- Technologies used: Java, Spring Boot, Hibernate/JPA, MYSQL, JUnit.
