

Shruti Rajkumar

Email: shrutirajkumart@gmail.com

Phone: 7676500969

Bangalore: 560076

Experience Summary:

- Having 3 years of IT experience currently working as a DevOps Engineer having strong experience with the tools like **Maven, Git, Jenkins, Ansible, Dockers, Kubernetes, AWS**.
- Working experience in continuous delivery, Infrastructure automation using Ansible.
- Hands on expertise in implementing DevOps culture through **CI/CD** tools like **Jenkins** and configuration management tool Ansible.
- Extensively used Jenkins to streamline **CI/CD process**, automated **Master-Slave configurations** using temporary slaves.
- In-depth understanding of the principles and best practices of **Software Configuration Management (SCM)** processes, which include compiling, packaging.
- Expertise in Source Code Management and repository tools **Git**.
- Extensively worked Jenkins for continuous integration and for End to End automation for all build and deployments.
- Expertise in Java builds tools like **Maven** for the building of deployable artifacts such as (jar, war & ear) from source code.
- Worked with System Engineers, QA, business and other teams to ensure automated test efforts are tightly integrated with the build system and in fixing the error while doing the Building and Deployment.
- Experience in using Ticketing & Bug tracking tool **JIRA**.
- Hands on experience in creating **Ansible playbooks** and Application deployment automation.
- Hands on experience in Container tool like **Dockers**.
- Experience in Dockers file, creating image from Dockers file, and hence into container.
- Experience in Orchestration tool **Kubernetes**.
- Expertise in creating Manifest file for creating Pods, Service, Replication, Deployment.
- **Hands on experience AWS like VPC creation, VPC Peering, EC2 creation, Load Balancer, Scaling Mechanism, IAM, SNS etc.**
- Experience in migrating on premise to cloud and migrating from region to region.
- Hands on Experience in **TERRAFORM**.
- **Cloud Watch** for monitoring server metrics, creating alarms & integrating with auto scaling
- Ability to collaborate with clients/project teams as well as work independently
- Effectively manage day-to-day tasks / activities in coordination with Team

Technical Skill:

Operating Systems	: Linux
CI/CD Tools	: Jenkins
Build Tools	: Maven
Version Control	: GIT
Application Server	: Apache Tomcat
Web server	: Apache
Container Tool	: Dockers
Configuration Management Tools	: Ansible
Orchestration Tool	: Kubernetes
Cloud Services	: AWS
Programming Language	: Python

Experience Profile:

- Having 3years of IT experience in Vigpgravitas Enterprises Private Limited. from June 2020 to till date.

Academic Profile:

Bachelor Degree in Civil Engineering from Bheemanna Khandre Institute of Technology

Project Profile:**Project #1**

Project : Ebates online shopping portal
Client : Ebates.com
Duration : July 2020 – Dec 2021

Description:-

Ebates.com is an online shopping portal which gives cash back for the purchases of customers. This site is used to display different coupons and discounts available for the user and also management of their account Ebates is all about saving money and getting Cash Back whenever you shop online when you become a member and shop through E-bates, you can save money every year on the things you're already buying. Once the user shops from the store those are displayed in Ebates.com site, cash back will be credited to their account.

Role and Responsibilities:

- Build and deploy of code different environment.
- Creating automated build and release environment using continuous integration tools Jenkins
- Creating branches & setting up projects using version control like Git
- Build plans in the Jenkins CI tool
- Develop and configure Jenkins CI tool for releases and enhancing/maintaining to suite the requirements.
- Work with project teams to determine an appropriate build schedule, then build and deployment process to respective environments
- Used Jenkins to automate the whole pipeline, with email notifications enabled for each success and failure of build or the process.
- Automate and monitor build with Jenkins. Troubleshoot application related issues
- Deploying the JAVA Wars and Jars appropriately and setting up the Apache Tomcat instances
- Work closely with Development and QA teams on building and Deployment issues
- Trouble Shooting in Application server when any issue rise
- Configuring the Docker containers and creating Docker files for various environments
- Creating Playbooks using resources in Ansible
- Involve in Check in / Checkout and merging related issues for Developers
- Troubleshoot application issues by log verification.
- Configuring the Dockers containers and creating Dockers files for various environments.
- Creating the Pods, Service, and Replication Controller by writing the manifest file.
- Setting up MASTER and WORKER NODE and adding the pods to the worker node in KUBERNETES.
- Implemented AWS solution.
- Perform system monitoring and maintain Logs using Cloud Watch.

Project #2

Project : Suncorp Insurance Portal
Client : Suncorp, Australia
Duration : Dec 2021 – till now

Description:-

Suncorp Group Limited is an Australian finance, insurance, and banking corporation based in Brisbane. Suncorp covers nearly all areas in wealth and banking, including life insurance, general insurance, commercial insurance, Compulsory Third Party (CTP), banking, finance, agricultural banking and business banking, the notable exception being health insurance data accuracy.

Role and Responsibilities:

- Creating branches, comparing & merging using Git.
- Maintain track of different releases that are being carried over in different environments.
- Creating packages using Maven.
- Automate the build Process Using Jenkins jobs.
- Automate and monitor build with Jenkins. Troubleshoot application related issues
- Used Jenkins to automate the whole pipeline, with email notifications enabled for each success
- And failure of build or the process.
- Making Application, Reports and Script ready for the Release on time.
- Troubleshooting application related issues by log verification.
- Verify Deployments logs to check for successful deployments.
- Documentation of the patch process and build/release Process.
- Experience in bug tracking and analysing test results and prepared Release Notes.
- Deploying the JAVA Wars and Jars appropriately and setting up the Apache Tomcat instances
- Work closely with Development and QA teams on building and Deployment issues
- Performing deployments to multiple environments like Dev, QA, Field, UAT & Production environments.
- Involved build/Release management and carried out the quality product in UAT and Production.
- Coordinating and tracking and updating all projects for finding defects and tasks releases using Project Management System JIRA

Declaration:-

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
