Professional Summary

- Results-driven and highly motivated software developer with a proven track record of successfully designing, implementing, and maintaining complex web applications.
- With expertise in JavaScript, Node.js, Sequelize, and Vue.js, I excel in both backend and frontend development.
- I am dedicated to delivering robust and user-friendly solutions while keeping a keen eye on emerging industry trends to continuously enhance my skills and remain at the forefront of technology advancements.
- Committed to contributing value and driving innovation in a dynamic and collaborative team environment."

Work Experience

DEC 2022 - Present

Software Developer

- Company: : Infynect Labs Pvt Ltd
- Project : OTT and Iptv Projects
- Location : Bangalore

SEPT 2022 - DEC 2022

- Company: : Monotype Solutions
- Project : Content Building Platform
- Location : Bangalore

Responsibilities :

Infynect Labs

- In my role as a Software Developer at Infynect Labs since December 2022, my primary focus has been on developing IPTV and OTT back-end systems.
- I've harnessed the power of Node JS for server-side development and employed Vue JS for crafting intuitive user interfaces. To manage database interactions, I've adeptly utilized Sequelize as an ORM, overseeing connections and queries within SQL and PostgreSQL databases for maintenance and debugging.
- My role also entails collaboration with cross-functional teams to pinpoint and resolve technical issues within the system. I'm committed to designing scalable solutions that enhance performance and user experience, followed by rigorous testing and debugging to ensure the stability and reliability of the backend infrastructure.
- My responsibilities also extend to actively participating in code deployment to production environments and promptly addressing incidents related to production issues.
- My role also involves enhancing the guest experience in luxury hotels by offering exclusive features. Guests can conveniently order food right from their rooms, making dining a seamless experience. Additionally, they can access information about nearby hotspot locations to explore the area's attractions.

Tools & Technologies used

Programming Language

- JS
- Java
- Python
- C

Frameworks

- Vue JS
- React JS
- SpringBoot

Databases

- SQL
- MongoDB
- Postgres

IDE

- IntelliJ Idea
- Eclipse
- STS

Web Technology

- HTML
- CSS

Courses

• Completed

- CORE JAVA
- HTML , CSS , JAVASCRIPT
- Vue JS

• Ongoing

- Docker
- Web Applications
