

AWS-DevOps Engineer

Sivarami Reddy

Email: sivaram98853@gmail.com
Mobile: +91-8977791951

CAREER OBJECTIVE:

Seeking an entry-level position in DevOps where I can leverage my skills in software development, system administration, and automation to contribute to the efficient and reliable delivery of software products.

Skill Summary (DevOps & AWS)

- Good Hands-on knowledge on Amazon Web Services (AWS) Cloud services such as VPC, EC2, IAM, S3, EBS, RDS, ELB, ROUTE53, SNS, Autoscaling (ASG), CloudWatch, CloudTrail, CloudFront, ECR, EKS, AWS Organization, Lambda.
- Hands-on knowledge in Amazon Ec2 deployments using DevOps tools like Jenkins, Docker, and Kubernetes.
- Hands-on knowledge creating and managing the IAM users, roles, policies for authorization and authentication purposes.
- Hands-on knowledge with the installation of Docker and knowledge of writing the Dockerfile to build the Docker images.
- Having good knowledge of Cloud Services like Compute, Network, Storage, and Security in AWS.
- Hands-on knowledge in the installation and management of Apache httpd, Tomcat, Flask, Node on various Linux Operating Systems like Ubuntu, RHEL and CentOS.
- Implemented the CICD process with Jenkins. Having knowledge on pipeline as a code in Jenkins.
- Knowledge in hosting static web applications on S3.
- Basic Exposure to Kubernetes(k8s). worked in the migration of Monolithic to MicroServices.
- Integrated Jenkins and GIT into AWS. Good Hands-on knowledge in Source version management tools like GIT.
- Hands-on knowledge with user-level Linux commands.
- Knowledge of writing the Terraform scripts for creating the infrastructure in AWS
- Knowledge in installation and management of Logging tools like ELK and Monitoring tools like Prometheus and Grafana.
- Hands-on knowledge in the creation of EKS Cluster and Deploy the docker images in Kubernetes.
- Having knowledge using maven, NPM to deploy java and NodeJS based web applications.
- Hands-on knowledge in creating Network Architecture like VPC, Subnets, Internet Gateway, NAT Gateway, and Route Tables in AWS.
- Hands-on knowledge on VPC peering and VPC endpoints.
- Knowledge of creating and managing the Helm Charts.
- Having knowledge in deploying the static language-based web applications on the Apache server.
- Having knowledge in deploying dynamic languages-based web applications on their targeted servers like Tomcat.
- Hands-on knowledge in the configuration of jobs, master nodes, and install the required plugins in Jenkins.
- Hands-on knowledge in setting up the databases using RDS in AWS.
- Hands-on knowledge in the replication of S3 and RDS across the regions.

- Proficient in the administration of Load Balancers (ALB/NLB) in AWS to manage the traffic.
- Proficient in the configuration of the different record types with various routing policies in Route53.
- Having the experience on Cloudwatch, SNS, to configure the alarms and alerts and Cloudtrail for Auditing purposes.
- Configured GIT with Jenkins and scheduled jobs using Webhooks, PollSCM, and Cronjob concepts.
- Hands-on knowledge in checking the code quality of the Developer's code with SonarScanner and Storing the Report in SonarQube.
- Having Knowledge in GitLab

TECHNICAL SKILLS:

Version Control system & Global/ Central Repo	GIT & GitHub, GitLab
CICD Tool	Jenkins, GitLab
Configuration Mgmt Tool	Ansible
Programming Language	Golang, Python Basic Knowledge
Build tool	Apache Maven
Containerization/Microservices/Orchestration	Docker, Kubernetes, Helm
Log Analysis	AWS CloudWatch, ELK
Monitoring Tools	Prometheus and Grafana
Ticketing Tools	JIRA
Web servers	Apache, Nginx, Tomcat, Flask, Node
Application servers	Tomcat
Databases/AWS RDS services	MySQL
AWS CLOUD PLATFORM	EC2, Route53, S3, CloudFront, RDS, VPC, ELB, IAM, SQS, Secret Manager, RDS, SNS, ECR, EKS
Artifactory	S3, Nexus
Code quality	SonarQube
Operating Systems	Linux, Ubuntu, Centos
Infrastructure Provisioning Tools	Terraform, Python,
Networking Protocols	TCP/IP, SSH, DNS, HTTP, HTTPS

PROJECTS:

Project #1	Terraform-Driven Infrastructure Deployment and Application Hosting on AWS EC2
Project #2	Static Application Hosting on AWS S3
Project #3	Hosted LAMP (WORDPRESS) on EC2
Project #4	Containerization and Orchestration with Docker and Kubernetes
Project #5	Deploy to the Grafana and Prometheus on top of the cluster by using Helm Chart.

Key Points:

- Implemented IAM based authentication and authorization for creating and managing the users/roles/policies.
- Configuring and Networking of Virtual Private Cloud (VPC). Develop Terraform scripts to create VPC and EC2 instances.
- Defined AWS Security Groups, which acted as virtual firewalls that controlled the traffic, allowed reaching one or more AWS EC2 instances.
- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux/Ubuntu) and configuring launched instances with respect to specific applications(static/dynamic).
- Configured Auto Scaling Policies of EC2 instances based on CPU, Network and Memory.
- Used Jenkins, Build jobs for Continuous Integration and Continuous Delivery (CICD) into Tomcat and HTTPD Application Servers.
- Developing build and deployment pipelines and jobs using Jenkins for Deployments to the Targeted Servers.
- Developed a fully automated continuous integration system using GIT, Jenkins and custom tools developed in Bash.
- Administered version control system (GIT) that included branching and merging Responsible for creating and developing the build process environment.
- Installing, configuring and administering Jenkins CI tool on Linux/Ubuntu machines.
- Well-versed with Amazon Web Services (AWS) provisioning and good knowledge of AWS services like EC2, Elastic Load-balancers, ALB, S3, CloudFront, EBS, RDS, VPC, Route53, CloudWatch, Cloud Trail, IAM.
- Launching Amazon EC2 Cloud Instances using Amazon Web Services (Linux/Ubuntu) and configuring launched instances with respect to specific applications.
- Implemented AWS EC2, IAM, S3, EBS, Elastic Load balancer (ELB), Auto Scaling (ASG) cloud services in AWS.
- Created alarms and notifications for EC2 instances using Cloud Watch.

- Created Docker files and Docker-Compose files to build images and pushed to the Container Registry (ECR) in AWS.
- Created Kubernetes manifest files for application and Deployed through Helm.

INTERPERSONAL SKILLS:

- ☐ Agile and Quick Learner
- ☐ Effective Communication and Active Listening
- ☐ Work Ethics and Punctuality
- ☐ Ability to face Challenges
- ☐ Team Player

LANGUAGES KNOWN:

- ☐ ENGLISH
- ☐ TELUGU

EDUCATION:

B.E Rajeev Gandhi memorial collage of Engineering and technology in Nandyal.
