Education

University of Mumbai

Bachelor of Computer Engineering

Aug. 2017 – Jul 2021

Thane, Maharashtra

Experience

ATOS

Release Manager

Sep 2021 - present

Mumbai, Maharashtra

- Coordinated weekly service releases with stakeholders, clients, and/or customers, ensuring timely delivery and quality control
- Change and release creation using ServiceNow tool
- Collaborated with clients, Change Management, and teams for proper planning and execution of activities
- Co-ordinating Go-live activities to deploy application/releases smoothly.
- Developed release plans and schedules in collaboration with cross-functional teams, improving release efficiency and maintained release processes, procedures, and documentation, improving process clarity and efficiency.
- Scheduling walkthroughs for different releases like Certificate renewal, deployment of application releases, office outages.

Exposys Data Labs

Data Science Intern

Dec 2020 – Jan 2021

- Project – Customer Segmentation – Using clustering, identify segments of customers to target the potential user base.
- Tools and Technologies : Python, Matplotlib, Seaborn, sklearn

Projects

Sales Prediction for a Pharmaceutical Distribution Company | *Python3, Dash framework, HTML* **January 2021**

- Developed a web application which helps Pharmaceutical Company to determine sales prediction, data visualization as well as getting answers to queries
- The project analyses sales data to optimize the planning of the stock by predicting the demand, using regression algorithms.
- It uses the libraries such as pandas, NumPy, scikit-learn and Matplotlib to analyse, visualize and predict the data.
- The SVR algorithm was applied which gave 83 percent accuracy, and the Dash framework was utilised to incorporate it into a web application.
- Paper published Link - <https://ijeap.org/ijeap/article/view/25>

Topic Modelling with Gensim | *Gensim, Spacy, pyLDAvis*

Feb2021

- Classifying topic from dataset using Natural Language Processing Techniques
- Used LDA model which has 20 different topics and pyLDAvis package for interactive chart in Jupyter

Technical Skills

Languages: Python, MS Excel

Leadership / Extracurricular

ATOS

PMO - VMO Analyst

- Excellent presenter and communicator who is at ease speaking to executives and stakeholders alike.
- Setting-up Financial Trackers for Work Orders. Resource forecasting as per SOW.
- Ensuring timely and accurate invoicing. Determining appropriate revenue recognition.
- Billing-Understanding the revenues vs. costs associates with the project.
- Accountable for overseeing the department's resource management. Set goals for headcount and efficiently manage the resource portfolio in terms of capacity and utilisation.
- Recording all resource assignments to projects and noting resource movement according to availability and skill.
