Objective

Seeking a challenging role to work in a professional environment that provides opportunity to learn key technologies, and to be an effective team player in developing, managing projects and to be an asset for the organization by delivering to the best of my capabilities.

Professional Summary

- 1 years of Experience as a Build **and Release/ DevOps** engineering in Software Configuration and Release management includes source code, build and deployment management and complete understanding of Software Development Life Cycle using Agile methodologies.
- Setting up and maintaining **CI & CD** pipelines and delivering releases for multiple Applications running on **Linux** based distributed Infrastructure.
- Expertise in supporting multiple projects during **builds** and **release** process. Hands on experience with version control tool **GIT and GITHUB**.
- Good working experience on **Linux and Windows** Operating Systems
- Hands on Experience with Build Tool **Maven** to generate project **Artifacts**.
- Hands on Experience in automating build process using **JENKINS CI** Tool.
- Experience on Setting up the Build Machines on various platforms.
- Good experience in deploying the files in **Tomcat** Server. Worked on ticketing tool like **JIRA**.
- Integration, deployment and administration of **Java** Application servers – Tomcat Application Server across **Linux** platforms. Experience on integrating Code Quality Analysis Tools like **SonarQube**
- Experience in using **Nexus**, Artifactory Repository Managers for Maven builds. Integrating **Nexus** with Jenkins to store artifacts.
- Experience in Terraform and Ansible. Creating custom image from a **Docker File**.
- Expertise in creating **Docker Images** and maintaining it in private Artifactory repository Nexus Hands on experience in Container Orchestration by using **Kubernetes** and **Docker Swarm**.
- Experience on writing **Docker-Compose Yaml** files.
- Experience on creating **Kubernetes** cluster and writing **manifest files** and services files
- Build and Deployment of the java applications onto different Environments like **QA**, UAT and Pre-Prod.
- **Troubleshoot** the Application related issues in **production & non-production** environments.
- Design, integration, deployment and administration of **J2EE** Application servers – Tomcat Application Server across **Windows** and **Linux** platforms.
- Good knowledge on **methodologies** like **Agile and waterfall model** for project planning and execution.
- Experience in end-to-end building and deploying and configuring process and implementation from local **QA** environment to **UAT** and **Production**.

- Managing **PaaS** platform hosted on **AWS** running with 99.99% uptime using **Auto scaling**.

Skills

Version control system	Git, GitHub
Operating Systems	LINUX, RHEL/CentOS 5.x/6.x/7, Windows
Monitoring Tools	Cloud watch
Scripting	Shell Scripting (BASH and Groovy basic knowledge)
Build Tools	Maven
Web Server	Apache
Application Server	Apache Tomcat
Artifact repository Manager	Nexus,
Quality code Management Tool	SonarQube
Continuous Integration Tools	Jenkins (CI)
Cloud Environment	AWS
Configuration Management Tool	Ansible
Containerization Tool	Docker
Container Orchestration Tool	Kubernetes
Bug Tracking Tool	Jira

Work Profile:

Current Designation : Cloud DevOps Engineer

List of Major Technologies: Windows, Red Hat Linux, Shell Scripting, Jira, Tomcat, Apache, Git, Maven, AWS, Ansible, Docker, Kubernetes

Academic Credential

Bachelor of Engineering from SSAHE University- 2022

Professional Experience

Working as a **Cloud DevOps Engineer** at Mphasis, Bangalore.

Project 3#

Project Name	Westlaw
Client	Thomson Reuters
Role	DevOps Engineer
Duration	MAR 2023 To till Date
Environment	Maven, GIT, Jenkins, Shell Scripting, Tomcat, Linux, ,Ansible, Aws, Docker, Kubernetes, .

Description:

Thomson Reuters Westlaw is an online legal research service for lawyers and legal professionals in the United States and is a product of Thomson Reuters. In addition, it provides proprietary database services. Information resources on Westlaw include more than 40,000 databases of case law, state and federal statutes, administrative codes, newspaper and magazine articles, public records, law journals, law reviews, treatises, legal forms and other information resource.

Roles and Responsibilities:

- Setting up the new build environment for various applications in **Windows/Linux** environment.
- Managed to organizational standards by maintaining the source code in **GIT** for various applications.
- Setting up the new Build Environment for various products in Linux Environment.
- Maintaining and extending configuration and build sub-systems on **GIT**.
- Creating and maintaining the development and release branches on **GIT**.
- Using **Maven** as a build tool, I could automate the process of building artifacts.
- Supported and helped to create dynamic views and **snapshot** views for end users.
- Implementing **Jenkins** continuous integration tool including installing setting the jobs/plans and setting up the tool for deployment.
- Involved in installing **Jenkins** on a **Linux** Machine. And creating a **Master** and **Slave** configuration to implement multiple parallel builds through a build.
- Used **AWS** services like **EC2, S3, EBS, Cloud Watch, ELB** for building infrastructure.
- Participates in the design and implementation phases for new and existing products, with a focus on **AWS** technical knowledge for successful execution of the requirements.
- Help engineering teams implement **new technologies** in development for future production deployment. Actively monitor and administer the applications and hosting environment to increase **efficiency, improve reliability, and minimize downtimes**.
- **Measurement, optimization and tuning** of system performance and ensuring that systems will run reliably and are highly available in a **24/7** production environment.
- Automated build deployments into **EC2** using **Ansible**
- Experience in installing and configuring Ansible on build server and having experience with playbooks using **YAML**.
- Using Configuration management tool Ansible for configuring multiple servers.
- Using Ansible to write Ad-Hoc for single Services & maintain Playbooks for multiple services.
- Used **Docker Container** for running different individual services and optimizing the infrastructure cost.
- Managing/Tracking the defects status using **JIRA**.
- Involved in deployment of the application using **Tomcat**.
- Primary responsibilities include Build and Deployment of the java applications onto different Environments like **QA, UAT, pre-Prod and prod**.
- Production environment support activities which include major release or emergency hot fix deployments, scheduling and coordinating with client regarding Operational Job Cycles or any activities.
- Implemented **CI/CD** using **Jenkins** and **Kubernetes**

Project#4 : Saudi Telecom

Client : Virtusa

Role : Build and Release Engineer

Project Name	Saudi Telecom
Client	Virtusa
Role	Build and Release Engineer

Duration	AUG -2022 to feb-2023 Date
Environment	AWS, GitHub, SonarQube, Jenkins, Ansible, Maven, Kubernetes

Project Description:

Saudi Telecom Company, (stylized as stc) is a Saudi Arabia-based digital company that offers telecommunications services, landline, mobile, Internet services, enterprise digital solutions, entertainment, fintech, and computer networks. The Saudi Telecom Company expanded beyond the borders of the host country and that the acquisition of 25% of the Axis Group - Malaysia and it is working in the field of telecommunications value of \$3.04 billion.

- Experienced in all SCM activities like Branching, Tagging, and Backup/Restore to Managing SCM tools Github including installation, configuration, and maintenance.
- Configured Jenkins master slave cluster using SSH protocols in AWS infra.
- Coordinate between key team members, including developers, QA, and support to promote, schedule, and perform deployments in various environments according to development timelines.
- Configured and worked on maven build tool for packaging for our source code
- Handling all phases of Build activities daily builds using continuous integration Jenkins, Debugging compilation, and runtime issues in build failures.
- Configured Jfrog integration for storing the artifacts and dependencies with Jenkins to build and deploy.
- Performed continuous Build and Deployments to Dev, Stage or QA and Prod environments. Experienced to configure various tools with Jenkins as per project.
- Responsible for Installation, Configuration, Access Control, Configuration jobs in Jenkins to implement Nightly Builds and Milestone Builds using Jenkins, Automated whole Build, and release for java web application using Jenkins.
- Worked on different services to setup infrastructure with security guidelines as per company norms, services are ec2, VPC, S3, ELB, cloud formation, cloud trail, IAM, EBS, Elastic Cache, Lambda Auto scaling etc..
- Worked in 24/7 rotational shift timings as per project needs.
