SKILLS

python | Testing skills | performance testing | Google Cloud Fundamental(GCP) | C | Cloud Computing | good communication and problem solving skills

COURSES

Automotive skills at Futureskills

May 2022 - Aug 2022

Robot framework and API testing at udemy

Jul 2022 - Aug 2022

Python testing at udemy

Dec 2021 - Feb 2022

CERTIFICATES

Google Cloud Migration Certificate by google cloud Platform

AWS Cloud Practitioner essential(classroom)

Roles and Responsibilities

Test Engineer

Completed PRP training in Python & Technology Testing including Python language, various testing streams like validation, regression testing, and selenium basics using web driver.

worked as a Test Engineer in a pilot project dealing with various test cases, test suites, validation including cluster validation etc.

I am also responsible for the Creation of test designs, test processes, test cases and test data; Carrying out testing as per the defined procedures; Participating in walkthroughs of testing procedures; Prepare all reports related to software testing carried out.

Performance Test Engineer

Worked as Test Engineer in a Client project as a performance tester using the Apache J-meter tool kit. responsibilities including the stability, scalability, speed and responsiveness of non-functional software in a given workload.

I am also responsible to ensure the application doesn't misbehave under the changing user load and that no bugs or errors reach the end user(client side).

QA Automation engineer

Recently started working on a US-based client project as a QA Automation engineer. Responsibilities included working as a member of the SDLC team in an Scrum environment, estimating, prioritize, planning and co-ordinate testing activities through an automated process using the selenium tool.
