

Seeking challenging assignments in the field of SOFTWARE TESTING to leverage experience and expertise with an organization of repute

SYNOPSIS

- ~ Dynamic and accomplished **Software Testing Professional** with **1.5 years** of experience in **Software Manual Testing and Automation Testing**
- ~ An active contribution in the design, development, testing, troubleshooting & debugging of the process, post-implementation, application maintenance and enhancement support to the client for the product / software application
- ~ Demonstrated excellence in the field of Software Test Life Cycle
- ~ Improve quality; reduce defects by supporting best quality practices and implement effective process improvement methods
- ~ Implemented best practices in different projects for smooth delivery as per customer requirements
- ~ Results-driven professional, recognized for taking on major initiatives, adapting to rapidly changing environments and resolving mission-critical issues to ensure bottom-line success
- ~ Build and mentor highly motivated project teams focused on achieving project and organizational goals

CORE STRENGTHS

*Manual Testing
Automation Testing
API Testing
Projects Handling
Software Test Life Cycle
Test Case Writing*

*Defect Reporting
Requirement Analysis & Gathering
Problem Resolution
Software Quality Assurance
Debugging
Troubleshooting Skills*

ACADEMIA

Masters in Embedded Systems from Manipal University in 2011 with 7.08
Bachelors in Computer Science from VTU in 2009 with 67.78

TECHNICAL PROFICIENCY

- ~ Programming Languages: JAVA
- ~ Testing: Automation (Selenium), Manual
- ~ IDE: Eclipse
- ~ Database: MySQL
- ~ Bug Defect Tool: JIRA

SUMMARY OF SKILLS

- ~ Good experience in Agile Process Methodology
- ~ Expertise in writing Test Cases and reviewing Test Cases
- ~ Experience on Functional testing, Integration testing, System testing, Regression testing, Retesting
- ~ Involved in Defect Life Cycle, SDLC, STLC, logging defects in JIRA tool
- ~ Efficiently performed Automation Testing of Web application using Selenium WebDriver
- ~ Converting Manual Test Cases into Automation Test scripts by using testNG
- ~ Skilled at dynamic elements using X-path expressions
- ~ Expert in handling frames, pop-ups, child browsers, Drop-Downs
- ~ Worked on Auto IT for uploading files & exposure to Page Object Model, TestNG and cucumber
- ~ Experience in adhoc testing, usability testing, manual API testing by using postman & Rest API
- ~ Worked with manual mobile testing for iOS, web Testing & Android applications
- ~ Worked on Assertions available in TestNG, visual studio test suite
- ~ Good knowledge on OOPS concepts, SQL & Collections
- ~ Involved in writing test scripts, executing in POM classes & reviewing test scripts
- ~ Execution of framework through Jenkins without using eclipse and execution of framework through MAVEN

PROFESSIONAL EXPERIENCE

BUNGALOW8 TECHNOLOGIES**(May'22 – Aug'22)****Quality Engineer****SUPERSOURCING, Remote****(Jan'22 – May'22)****Quality Analyst****DIGITAL FUTURE OF EDUCATION PRIVATE LIMITED, Bangalore****(Mar'21 – Jan'22)****Software Testing Engineer**

PROJECTS HANDLED

Project#1: One.class**Duration:** 6 Months

Description: In this project, worked on three different platforms. They are android, ios & webapp. This application is mainly used in Schools, Colleges and for online as well as classroom sessions. In this project, we have mainly 2 modules. Teacher & student modules. In the teacher module, there are different modules like book bin, pulse, buzzer, exams, whiteboard & groups.

Responsibilities:

- ≈ Understanding the requirements and functional specifications of the Project and test cases (Regression Test Case)
- ≈ Involved in writing test cases, performing sanity, thorough, whole app testing and preparing test data
- ≈ Analysed Test Results, Reporting and Tracking Defects
- ≈ Involved in raising the bugs in Jira
- ≈ Responsible for daily and weekly status reports

Project#2: RTH Handling Systems**Duration:** 8 Months

Description: This project is a Web based Application. This application is mainly used in Hospitals. In this project, we have mainly two modules. User & admin modules. Admin will be creating different departments, doctors, patients, nurses, pharmacists, laboratories, accountants & receptionists. Have worked with API testing.

Responsibilities:

- ≈ Converted test case into test script
- ≈ Successfully implemented automation using Selenium WebDriver, Java
- ≈ Responsible for identifying test cases for automation
- ≈ Involved in preparing POM classes
- ≈ Involved in writing test script by using TestNG, execution of test scripts
- ≈ Involved in reading from and writing data into excel sheet using Apache POI library

Project#3: Portal apps**Duration:** 4 Months

Description: This project is based on web application and it is mainly based on car companies. We have to login to the portal. There will be different stations, lines & products. Here there will be different cameras.

Responsibilities:

- ≈ Involved in documenting the test cases
- ≈ Written scenarios and test cases based on the requirement
- ≈ Involved in logging defects in JIRA tool

PERSONAL SPECIFICS

Date of Birth: 02nd September, 1987**Languages Known:** English, Hindi, Kannada & Konkani
