

INFORMATION SECURITY ANALYST

SRINU DOMA

Mobile: +918977167276

Email: Srinudoma1318@gmail.com

Summary:

I have **4+ years** of experience in Cyber Security. Working in different environments in several roles on multiple technologies has given me good exposure, which not only helps me learn new things faster but also allows me to provide a solution with great results. My understanding of any business requirements and implementing it from a technical stand-point converts my projects and tasks to success Endeavour's in a teams..

Skills and Expertise:

- Working knowledge of SIEM (Arcsight, IBM QRadar, Splunk) and log management technologies.
- Working Knowledge on EDR tools like Crowd strike and carbon black.
- Security Information & Event management (SIEM) tool: ArcSight.
- Azure Security Services – Azure Active Directory – B2B & B2C, Key Vault, Multi-Factor Authentication, Data Loss Prevention (DLP)
- Working Knowledge on Azure Sentinel Cloud native SIEM
- Detect security alerts from various domains through Azure Sentinel, perform end to end investigation through available resources, and report all the findings and take appropriate actions to remediate issue.
- Knowledge of Networking Technologies like TCP/IP, DHCP, DNS, routers, Gateway, network ports and protocols.
- Cyber Security: Implementation and SOC operations using SIEM & VA Cyber security tools.
- Network Security: Implementation and Troubleshooting of IDS/IPS, analyzing network traffic flows to firewall ports.
- End Point Security: Investigating of end user and entity incidents using UEBA and Advanced Entity Analytics

Technical Skills:

- | | |
|-----------------------------|--|
| • Cyber security SIEM | : IBM QRadar, Arcsight, , Splunk |
| • Network Security Firewall | : Palo Alto, Cisco ,Panorama |
| • Endpoint Security | : Crowd Strike, Carbon Black EDR |
| • Vulnerability Assessment | : Nessus, Qualys |
| • Ticketing Tool | : Service Now, Jira |
| • Operating Systems | : Windows and Linux |
| • Packet Capture | : Wire shark |
| • Languages | : Python(Knowledge) |
| • Other monitoring tools | : Virus total, MX Tool, IP Void, URL Scanning, URL Void, Hybrid-Analys
Phishing and Email security ,threat analysis |

Professional Experience:

TECH MAHINDRA (Chennai)

NOV 2019 to Till Date

SOC Analyst

Job Responsibilities:

- Working in a SOC (Security Operation center) with multiple clients on Real Time Threat Management using SIEM
- Real time Monitoring of Alerts using IBM QRadar SIEM Tool International.
- Involved in 24*7 SOC Operations high availability environment.
- Experience in Information Security Management using SIEM tools (Arcsight, IBM QRadar)
- IBM QRadar) with strong capability of planning and delivering SIEM practices.
- Performing real-time monitoring, Investigation, Analysis, Reporting and escalation of security events from multiple log sources.
- Use SIEM tools to detect possible signs of security breaches and perform detailed investigation to confirm successful breach. Perform root cause analysis and appropriately handle the incident as per defined Incident Management Life Cycle.
- Analyzing, researching windows/Linux Security logs as well as logs from IDS/IPS, Next generation firewall, Antivirus/Malware, Vulnerability Assessment solutions.
- End Point Security: Investigating of end user and entity incidents using UEBA and Advanced Entity.
- Manage and fine-tune EDR tools like Crowd strike and Carbon black configurations for optimal performance.
- Log source integration, Monitoring and investigation of security incidents in SIEM tool.
- Monitoring, analyzing the events in SIEM and creating a triage report for the investigation with all the necessary details. Adhering to the process defined by client and escalating the case.
- Following end to end Incident Investigation and Incident Response process, ensuring to close the investigation within defined SLA.
- Creating the asset, scheduling scan and reporting of vulnerabilities using Nessus.
- Performing Vulnerability Assessment on the Infrastructure Devices viz. Servers, Network Devices, Web Applications.
- Maintain keen understanding of revolving internet threat to ensure the security of client networks.
- Contacting the customer directly in case of high priority incidents and helping the customer in the process of mitigating the attack.
- Analyzing malware alerts for indicator of compromise (IOC) and indicator of attacker (IOA), Investigation and mitigation of risk.
- Experience in Cyber Security specialized in Cyber Threat Detection and special emphasis on Threat analysis and seeking a job position in a reputed organization.
- Responsible for specialized investigation, threat analysis and remediation of malware issues, phishing email along with anomaly behavior of devices within organizations.

- Good knowledge about IAAA, CIA, Malware, Cyber kill chain, Attacks, true positive and false positive, SIEM components.
- Experience in networking Concepts such as OSI reference model, TCP/IP 3-way handshake and networking devices.

Education :

- MBA in Finance and Marketing in Rajiv Gandhi Institute of Management and Sciences
- B.COM from Ideal College of Arts & Sciences.
- Intermediate from PRG Junior College.
- SSC from PRG boys high School.

Declartion:

- I hereby declare that the above-mentioned information is correct up to my knowledge and I bear that responsibility for the correctness of the above-mentioned.
