INTERNSHIPS

Amazon Development Centre India Pvt. Ltd.

Software Development Engineering Intern - (Jan 2023 - Jun 2023).

I played a key role in developing robust software and applications. I design High-Level Design (HLD) and Low-Level Design (LLD) for projects and implementing them, along with comprehensive documentation. One of my major achievements was fully developing a feature named "Influencer Style Feed," which is now in production. Additionally, I conducted unit and integration tests to ensure the correctness of the software. I successfully deployed multiple codebases to production, contributing to the team's success. Overall, my internship at Amazon supplied valuable insights, hands-on experience, and enriched my technical skills in software development.

Skills: Front End Development, Backend Development, RESTful API Development, UI/UX Design, System Design, CI/CD, Java, react (React redux), HTML, CSS, AWS Service (Dynamo DB), Software Development, Unit Testing, Integration Testing, Code Debugging.

Leadership Principles: Ownership, Learn and Be Curious, Dive Deep, Earn Trust, Bias for Action, Deliver Results.

EDUCATIONS DETAILS

Degree	University/Board/School	Year	Percentage/CGPA
B.Tech. CSE (Bachelor's degree)	Graphic Era Hill University, Dehradun	2019-2023	7.9 CGPA
Intermediate (Senior Secondary School)	CBSE: B.R.M.S School, Pauri Garhwal	2018-2019	70%

SKILLS

- Technical Skills:** Data Structure and Algorithms, Java, Front End Development, Backend Development, Software Development, System Design, C++, JavaScript, HTML, CSS, Networking, Database Management System (DBMS), Operating System, Software Development. React, MySQL, React-Redux, Git, GitHub. Python, PHP, MongoDB, AWS (Dynamo DB), CI/CD (Pipeline Management), UI/UX design, Object-Oriented Programming (OOP), Android Development.
- Soft Skills:** Problem Solving, Communication, Time Management, Project Management, Collaboration, Adaptability, Creativity, Leadership, Critical Thinking, Patience, Teamwork, Good Learner, Good Observer.

PROJECTS

Influencer Style Feed: 01/2023-06/2023 - (6 months)

Took ownership of a significant influencer-style feed project from start to production, overseeing both backend and frontend development. Conceptualized and implemented a dynamic feed like Instagram, allowing influencers to share tagged photos and videos with purchasable products. Engineered an intuitive infinite scroll feature to elevate user experience. Utilized React, Redux, HTML, CSS, and JavaScript for frontend development, while harnessing Core Java, AWS DynamoDB, and API Gateway for backend operations. Introduced a robust post filtering system based on tags, resulting in increased user engagement. Successfully guided the project through critical stages, including beta, gamma, pre-production, and seamless deployment to production. These

experiences highlight my ability in Java backend development, AWS integration, and the creation of feature-rich, user-centric applications using innovative frontend technologies, despite my status as an intern.

Skills: Java, React, HTML, CSS, AWS Services (DynamoDB, API Gateway, Lambda Functions), Front End Development, Backend Development, RESTful API Development, System Design (HLD & LLD), Testing, Debugging, Documentation, Software Development.

Glimpse: Social Media and Travel Planning Application: (06/2023-Present) (Under Development).

Glimpsy is a multifaceted social media and travel planning platform designed to foster connections, share life moments through photos and videos, facilitate real-time communication, and empower seamless trip planning. This project serves as a comprehensive application that caters to various aspects of social interaction and travel coordination.

Key Features:

- **Moment Sharing:** Users can effortlessly capture and share life's moments through photos and videos, allowing friends and followers to engage with their experiences.
- **Instant Messaging:** Glimpsy incorporates a robust messaging system that enables users to connect with each other in real-time, resembling popular messaging applications.
- **Travel Planning:** The platform offers a unique travel planning feature where users can organize and manage their trips. This includes setting itineraries, tracking expenses, and coordinating travel.
- **Trip Invitations:** Users can invite friends to join their planned trips, transforming Glimpsy into a collaborative travel companion.
- **Budget Management:** The application assists in managing trip budgets, providing users with insights and tools to ensure their travel plans stay within financial constraints.

Skills: Java (Spring Boot), MongoDB, React, RESTful API Design, User Authentication, Cloud Deployment (Azure/AWS)

ACHIEVEMENTS

- ❖ Internship at Amazon
- ❖ Rank 605 in TCS Code Vita 2022
- ❖ Rank 2000+ in Google Kick Start round B in 2022.
- ❖ Finalist in two Hackathons (Dev-Bhoomi Cyber Hackathon, Hack-on)

CERTIFICATES

- ❖ Internship at Amazon
- ❖ UI/UX Course from Adobe

LANGUAGES

- ❖ English
- ❖ Hindi
- ❖ Garhwali
- ❖ Sanskrit

HOBBIES

- ❖ Playing Table Tennis
- ❖ Playing Chess
- ❖ Watching Movies
- ❖ Drawing
