in Supra_Sinha

📍 Bengaluru, Karnataka

Experienced Java developer with a strong background in designing, developing, and maintaining Java-based applications. Proficient in a wide range of Java technologies and frameworks. Skilled in problem-solving, code optimization, and collaborating effectively with cross-functional teams. Committed to delivering high-quality software solutions that meet business needs and exceed client expectations.

PROFESSIONAL EXPERIENCE

Associate Software Engineer, Mphasis Ltd.

09-2021 – 02-2023

Bangalore

- Skilled in the role of an Associate Software Engineer, encompassing responsibilities in development, execution, performance, and team management.
- Developed and maintained Java applications, utilizing Java SE and EE, resulting in efficient and user-friendly software solutions.
- Utilized Java frameworks such as Spring to streamline development processes, resulting in faster project delivery and improved maintainability.
- Created a SPRING BOOT MAVEN Project in Eclipse using Tomcat Server, and built up using the tool Maven and MySQL.
- Developed and maintained Java applications, ensuring high-quality code and adherence to coding standards. Implemented new features and functionality, and resolved software defects.
- Guided a group of developers in the successful delivery of pivotal projects, ensuring the projects were completed within specified timelines and met stringent quality criteria.
- Detected and resolved bugs in the development phase.
- Outstanding abilities in communication, analysis, issue resolution, and documentation.
- Generated monthly reports using data and delivered presentations during meetings.
- Played a key role in designing the architecture of complex software systems, ensuring scalability and performance. Collaborated with architects to create robust solutions.
- Integrated Java applications with databases (e.g., MySQL, PostgreSQL) using JDBC and ORM frameworks, optimizing data retrieval and storage processes.
