Professional Summary:

- AWS DevOps Engineer with 2 years of experience in AWS, developing CI/CD pipelines and optimizing deployment time. Utilized Kubernetes, Docker, Jenkins, AWS, Ansible and Puppet to build, test and deploy
- Experience in CI/CD methodologies using Jenkins, Docker, Kubernetes and AWS (Amazon Web Services) to support weekly releases.

Professional Experience:

Project Engineer

Wipro, Delhi | Oct 2021–Sept 2023

- Collaborated with cross-functional teams to design and implement cloud-based solutions on AWS, optimizing performance, scalability, and cost-efficiency.
- Automated infrastructure provisioning and application deployments using Terraform, Ansible, Jenkins, and AWS CloudFormation.
- Established and maintained CI/CD pipelines, integrating Git, GitHub, and AWS Code Pipeline for efficient software delivery.
- Monitored system performance and implemented proactive measures using AWS CloudWatch, Nagios, Grafana and custom monitoring solutions.
- Designed and developed scripts to automate client/server functions, reducing manual tasks and enhancing system reliability.
- Demonstrated expertise in AWS services, including EC2, ELB, S3, IAM, and ECS, to architect and optimize cloud ready applications.
- Utilized strong Unix knowledge to troubleshoot and enhance system performance.
- Managed CI/CD pipelines using Jenkins to facilitate continuous integration and continuous delivery of applications.
- Applied data center best practices, high-availability systems, capacity planning, and diagnostic techniques to ensure reliable and scalable infrastructure.

Key Achievements:

- Led successful migration projects, reducing operational costs by 20% and achieving 99.9% uptime.
- Implemented auto-scaling and load balancing, resulting in reduced downtime by 30%.
- Reduced deployment times by 40% through automation and efficient CI/CD practices.
- Collaborated with the development team to implement CI/CD pipeline using Jenkins and Git for version control.
- Assisted in migrating on-premises applications to AWS, optimizing resource utilization, and reducing infrastructure costs by 20% through rightsizing and automation.
- Implemented monitoring solutions using Prometheus and Grafana to proactively identify and address performance bottlenecks, reducing system downtime by 15%.
- Successfully resolved complex customer problems spanning multiple AWS services.

Education:

Mahatma Jyotiba Phule Rohilkhand University
Bachelor of Technology
Computer and Information Sciences | 2017 – 2021

Skills:

- Cloud Platforms: AWS
- Containerization: Docker, Kubernetes
- Version Control: Git
- AWS Core Services: EC2, VPC, IAM, ELB, S3
- CI/CD Tools: Jenkins, AWS Code Pipeline
- Configuration Management: Ansible, Chef
- System Performance Monitoring: Nagios, Grafana, Prometheus, AWS CloudWatch
- Scripting and Automation: Bash, Shell
- Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Ansible
- Operating Systems: Linux (Ubuntu, Unix)
- Databases: Amazon RDS, IBM DB2

Certifications:

Amazon Web Services DevOps Engineer – Professional

Issued Jul 2023 - Expires Jul 2026
VC5K63WCXEFQQWSZ

Amazon Web Services Developer – Associate

Issued Jun 2023 - Expires Jun 2026
04Z6GSR20BQQ1458

AWS Certified Cloud Practitioner

Issued Jul 2022 - Expires Jul 2025
B2TLLQPBPEV4Q9C7
