- Detail-oriented **Software Test Engineer** with expertise in testing complex user interface (UI) projects and integration solutions. Experienced in ensuring the **functionality, usability, and performance** of critical components. Proficient in conducting comprehensive testing across various modules and features to deliver high-quality user experiences.

SKILLS

Soft Skills

Test Planning | Test Scenarios | Test Cases | Test Script | | Test Management | Project Management | Communication | Organizational Skills | Strategy | Problem-Solving | Software Development

Technical Skills

SDLC | STLC | Agile Frameworks | Selenium Automation Framework | Functional Testing | Non-Functional Testing | Defect Life Cycle | Quality Assurance | Traceability Matrix

Testing Method

Functionality Testing | Integration Testing | System or End to End Testing | Smoke Testing | Adhoc Testing | Compatibility Testing | Regression Testing | User Acceptance Testing | Usability Testing | Performance Testing | Globalization Testing

Performance Tools

Jmeter | POSTMAN

Programming Language

Core Java

Database

SQL

WORK EXPERIENCE

Junior Software Test Engineer

Gad A Get Computers, Chennai

Sep 2021 - Present

- Good understanding of the **SDLC, STLC, Waterfall & Agile Methodologies**
- Experience in Automation Tool- **Selenium framework**.
- Possess experience in performing **Black Box Testing** including in **Functional testing, Smoke testing, System Integration testing, User Acceptance testing, Regression testing, Usability testing and Performance testing**
- Expertise in **Desktop & Web** application Testing carried out in various **compatibility** and **platform testing**.
- Hands on experience in identifying **Test Scenarios, Test Plan Creation, Preparing Test cases, Preparing Test Scripts, Test Execution, Defect tracking and documenting the Test results** .
- Hands-on experience in testing Client Box in Live Environment.
- Worked closely with client stakeholders and Development team to ensure **End to End Testing**
- Experience in various testing areas like **Localization & Accessibility and Cloud testing**.
- Extensive working experience in **Defect Tracking and Reporting in Jira**
- Basic knowledge of in **Playwright Automation** web automation Tools.
- Ability to quickly learn new technologies and work on them within a short span of time
- Mentored team members and worked collaboratively with them to resolve the issues

EDUCATION

Bachelor of Engineering:Mechanical Engineering

Mookmaibigai College of Engineering

CGPA: 6.59

Aug 2015 - Nov 2019

CERTIFICATIONS

Automation Testing

Jul 2021 - Sep 2021

Certified at "Q Spiders Software Testing Training Institute" ,Chennai.

Manual Testing

Apr 2021 - Jun 2021

Certified at "Q Spiders Software Testing Training Institute" ,Chennai.

Core Java

Apr 2021 - May 2021

Certified at "Q Spiders Software Testing Training Institute" ,Chennai.

SQL

Jun 2021 - Jul 2021

Certified at "Q Spiders Software Testing Training Institute" ,Chennai.

PROJECTS

Genesys Adapter Product

Sep 2021 - Present

Clients: US Prudential ,Japan Prudential

- Led testing efforts for Gad-A-Get Computers' integration solutions, ensuring compatibility and functionality across **Genesys infrastructure** and third-party applications including **Salesforce, ServiceNow and Oracle Cloud**.
- Developed comprehensive test plans and strategies for **Genesys Adapters**, including Salesforce, ServiceNow, and Oracle Cloud, focusing on call controls, **CRM functionality, media channels(Voice, SMS, Chat, Email) and voicemail**.
- Conducted rigorous testing procedures including **call controls (answer, mute, unmute, hold, retrieve, DTMF, disconnect, record, secure pause), transfers, conference calls, callback calls,CRM events, and activity popups**, ensuring adherence to project requirements and industry standards.
- Collaborated closely with development teams to **identify and troubleshoot integration issues**, ensuring timely resolution and optimal **performance of integrated solutions**.
- Documented **test cases, results, and defects using industry-standard tools**, facilitating effective communication and tracking of project progress.
- Played a key role in **enhancing product quality and user experience** through **continuous testing, feedback analysis, and process improvements**.

Gad A Get Computers Website

Sep 2021 - Present

- Employing **Selenium** automation tool to verify all **menu items, tabs, links, and forms** on the Gad A Get Computers website.
- Developing and executing **automated test scripts** to ensure the functionality and reliability of website components.
- Conducting thorough testing to validate **user navigation, interactive elements, and form submissions**.
- Collaborating with development and QA teams to address identified issues promptly and **enhance user experience**.

CXi-UI Product

Oct 2021 - Nov 2022

- Spearheaded testing efforts for CXi UI, a key component of Gad A Get Computers' solutions, focusing on **functionality, usability, and performance** across different modules and features.
- Developed and executed detailed **test plans and strategies to validate** the CXi UI application, ensuring adherence to functional requirements and design specifications.
- Conducted rigorous testing procedures including **functional testing, regression testing, user acceptance testing (UAT), ETL testing and performance testing** to identify defects and ensure optimal performance under varying conditions.
- Utilized **JMeter and Postman** for performance and **API testing**, enhancing **test coverage and efficiency** for the CXi UI application.
- Provided timely feedback and recommendations for **enhancements and improvements** to the CXi UI application based on testing results and user feedback

Pointel Website

Nov 2022 - Present

- Utilizing **Selenium automation** tool for verifying all **menu items, tabs, links, and forms** on the Pointel website.
- Designing and implementing **automated test scripts** to ensure the **functionality and integrity** of website components.
- Conducting comprehensive **testing to validate user navigation, interactivity, and data submission processes**.
- Collaborating with development and QA teams to address any identified issues and **enhance the overall user experience**.
