SKILLS

PROGRAMMING LANGUAGE:

C, C++, Java

DATABASE:

MySQL

SCRIPTING LANGUAGE:

HTML/CSS

TOOLS

Canvas, Eclipse, Visual Studio Code

EDUCATION

SSLC – Chettinad Rani Meyyammai
Matriculation School, Puliur(c.f)
Karur(dt).
Percentage – 93.3%
2017

HSC – Bharani Park Matric.Hr Sec
School, Salem-Bye Pass Vennamalai ,
Karur(dt).
Percentage – 73.33%
2019

B.E-CSE – K.S.Rangasamy College
Of Technology, Tiruchengode.
CGPA – 8.3
2023

SWATHI R

OBJECTIVE

I will do my best for making a significant contribution to the success of the company.

PROFESSIONAL PROFILE

I am a student of Computer Science and Engineering and looking forward for working in an MNC.

PROJECT

TITLE:. Jumping box game

LANGUAGE USED: HTML, CSS, Javascript

OVERVIEW: Jumping box game is fun game. It is developed by using html, css and javascript language everything is well explained. If the big box jump without touch the small box the player will get a score and he/she wins.

TITLE: Smart Irrigation System Using Iot

TOOLS USED: 5V single channel Relay Module, ESP8266 Nodemcu Module, Soil moisture Sensor, Temperature Sensor, Submersible motor pump, Jumper wires, Bread board

OVERVIEW: Irrigation is one of the traditional practice and involves higher percentage of labourism daily agriculture sector. To water the plants automatically, sensors and Microcontrollers are available to determine when the plants needs water.

HOBBIES

- Singing
- Dancing
- Drawing

AREA OF INTEREST

- Web Development.
- App Development.
- Graphic Designing.
- Coding.

TITLE: An Efficient Deep Learning Model For Disease Prediction Using Convolutional Neural Networks

ALGORITHM USED:CNN

OVERVIEW: Currently, the scenario is if the patient is suffering from any symptoms then he/she must visit to the doctor or to the hospital to diagnose the disease. But, our main objective is to reduce such efforts taken by patients only to diagnose the disease. Many patients are losing their life only because of the late diagnosis of their disease. So our main aim is to reduce such deaths. The objective of our project is to develop a computerbased system that can accurately diagnose diseases based on medical images such as X-rays, CT scans, MRIs, or other types of medical imaging. CNNs are a type of deep learning algorithm that are particularly effective in image analysis tasks because they can automatically learn features from the input images without the need for explicit feature engineering.

TRAINING, PARTICIPATION, AWARDS, REWARDS & CERTIFICATION

- I had Completed Cybersecurity internship at cisco networking academy.
- I had successfully completed my internship as Campus Ambassador in InternBug, Lyricious and Planeducator.
- I had successfully completed my internship as graphic designer at krashitservice.
- I had successfully completed my internship as Web developer at letsgrowmore.
- I had Completed Learnathon 2020, Skilledge 2020 and Learnathon Courses offered by ICT academy
- I had Completed html and css courses offered by greatlearning
- Certification of Participation for Participated in ROUND 1A of Global Programming Competition, Snackdown 2021 organised by CodeChef.
- Certification of Participation for Participated in Level 1: ECommerce & Tech Quiz of Flipkart GRID 3.0 - Software Development Challenge organised by Flipkart.

PERSONEL DETAILS

Father : Ramalingam P

Mother : Rajeshwari R

Date Of Birth : 18.10.2001

Nationality : Indian

Gender : Female

Language : Tamil and English
