Experience

Java Full Stack Developer

APT IT SOLUTIONS

04/2023 — Current

Madhapur.Hyderabad, India

• PROJECTS

• PAYROLL MANGEMENT

- Technologies: Java, Spring Boot , MY SQL 8.0.34
- Contributed significantly to the creation of the system for Payroll Management..
- Worked on the design, implementation, and upkeep of the loan master module and loan transaction module for automated employee loan tracking with a cross-functional team.
- Developed and put into use reliable APIs with JAVA spring boot for processing loan data, which enhanced data accuracy and speeds up the loan application process.
- Optimized database queries and data retrieval processes, leading to a significant reduction in processing time.

• NFC CARD (APT CARD)

- Technologies: Java , Spring Boot, MySQL 8.0.34, React Js 18
- Contributed actively to the NFC Card (APT Card) project, which provided customers with digital business cards for environmentally responsible networking.
- Worked on React Js to Develop a user-friendly and accessible digital card interface.
- Implemented QR code backup functionality for cases where NFC technology is not supported, ensuring compatibility across various devices
- Developed the backend infrastructure with spring boot and MySQL for storing and retrieving digital card data securely.
- Took part in testing and feedback sessions with users, which led to incremental platform enhancements for digital cards.

• MENU CARD

- Technologies: Java, Spring Boot, MySQL 8.0.34
- Utilizing Spring Boot,Iam creating a dynamic menu card solution for restaurants, accessible through QR code scanning.
- This innovative approach enables patrons to instantly view a diverse array of cuisine types and specific menu items.
- Leveraging Spring Boot's versatility, the system retrieves and displays real-time menu information, enhancing the dining experience by providing an interactive and user-friendly interface.

• EMPLOYEE ATTENDANCE ID TAPPING SYSTEM

- Technologies :Java, Spring Boot , MySQL 8.0.34
- Spring Boot powers employee ID card tap system for smooth login/logout, ensuring secure access, accurate work hour calculation, and efficient data storage.
- This optimizes HR processes and operational transparency by capturing taps, calculating time gaps, and

streamlining tasks
