Professional Summary

- 2+ years of experience working on various automation technologies such as **Selenium WebDriver with Java, Appium and BDD cucumber.**
- Integrated **Data-driven** testing into the framework and introduced a **database (MySQL)** in our framework.
- Experience in **Continuous Development** techniques and pipelines (**Jenkins, GitHub & CI/CD**) infrastructure for test automation.
- Sound knowledge of **Object Oriented Programming.**
- Working knowledge of **JIRA & Maven.**

- Logical with excellent communication, able to work in a team and intuitively produce results promptly.
- Inquisitively identified possible risks and came up with mitigation plans to work around problems to give successful products to clients and stakeholders

Projects

2023/04 – present	Shoppers Stack <i>Ecommerce domain</i> • Worked with a team of 10 members to develop a robust framework using Selenium with Java integrated with TestNG, Maven, Git and Jenkins. • Revamped automation testing processes using Agile methodologies. • Worked on converting mobile test cases to automation scripts using Appium client. • Tested the same application on Emulators as well as real devices. • Failure Analysis of Automated Test Cases in case of Test failures to check any discrepancies in the Script or the presence of any defects in the application and handle these issues accordingly.
2022/04 – 2023/04	Vtiger <i>CRM domain</i> • Involved in daily scrum meetings to share the info with the team during a sprint. • Designed and developed test scripts for automated testing using Java, Selenium Webdriver, TestNG, and Eclipse IDE. • Involved in the preparation of Hybrid framework design. Created customized automated test scripts using selenium and TestNG for the web-based application while performing sanity, integration, system, functional and regression testing. • Created Page Object Mode, Data-driven frameworks to provide reliable and working software. • Performed cross browser and parallel testing for web based by using Webdriver, TestNG. • Responsible to perform user acceptance and end to end testing in order to provide reliable product to the clients.
2021/05 – 2022/04	Fire Flink <i>Test Automation Tool</i> • Assisted in manual testing of software solutions, contributing to the identification of 50+ system defects. • Utilised JIRA for timely reporting and tracking of system bugs, ensuring zero backlog in correction • Implemented functional testing to verify system output and contributed to a 10% improvement in system stability • Executed close to 1000+ Test cases to ensure product quality even in deadlines. • Wrote multiple web and mobile locators to test the element locator plugin by verifying the automatically generated locators with manually derived locators. • Took part in Agile processes to interact with team members, Stakeholders, Developers and Clients.
2020/05 – 2021/05	UoPeople <i>Edutech domain</i> • Providing guidance and support to students or program participants. • Advising on program selection, course curriculum, and career pathways. • Conducting needs assessments and developing personalized learning plans. • Collaborating with educators and administrators to enhance program effectiveness. • Handling inquiries, resolving issues, and ensuring a positive experience for participants.

Achievements

- Was named Star performer of the year for the year 2022-23
- Helped build capability in team by guiding and mentoring junior
