Skills

- Automation Tool – **Selenium**
- Programming Language – **JAVA**
- Unit Testing Framework – **TestNG**
- Framework – **POM With PageFactory**
- Project Build Tool – **Maven**
- IDE – **Eclipse**
- Defect Tracking Tool – **JIRA**
- Version Control – **GIT**
- CI/ CD Tool – **Jenkins**
- OS – **Windows**
- IDE – **Eclipse**
- Database – **SQL**

Education Background

Master of Computer Application

Depaul Institute Of Science Technology
Angmaly. 2011

About Me

I have 3.3 years of experience in Manual and Automation testing along with extensive knowledge in Java and oops concepts, seeking to attain a position in an organisation where I can utilize my skill and contribute towards the growth of the organisation.

Professional Experience

Working Knowledge with Selenium **WebDriver** and **TestNG** framework

Good Experience in **Maven** as project Build tool.

Worked in **Page Object Model design pattern with Page Factory**

Good Experience in Data Driven Testing with TestNG framework.

Automation Test Scripting, Test Case Development, Test Execution, Defect Reporting/Tracking using **JIRA**.

Good Experience in Functional Testing, **Smoke Testing, Regression Testing, Black box testing**.

Good Understanding in SDLC, STLC and Bug Life Cycle.

Hands on experience in Black Box Testing Methodology and Levels of Testing.

Good Experience in **Agile-Scrum** Methodology

Good expertise in Test management and traceability using JIRA

Expertise in Core Java and OOPS Concept

Working Knowledge in **Database Testing** and **API Testing**

Hands on experience in writing **XPath** to locate webelements

Having good understanding and knowledge of **Maven, Git**.

Experience in Manual testing of the **REST API's** using **Postman** Good experience in implementing CI/CD pipelines using **Jenkins**

Experience

Nuaxil Technologies

October 2020– Present

- Conducted requirement discussions with the product team and identified test scenarios
- Utilized Jira for test case and test data preparation. Good Experience in Data Driven Testing with TestNG framework.
- Developed automation test scripts using Selenium, focusing on identifying and automating key test scenarios.
- Utilized Selenium automation framework, incorporating WebDriver, Java, and TestNG following the Page Object Model.
- Performed Cross-Browser Testing and participated in Smoke, Sanity, Functional Testing, and Regression Testing.
- Demonstrated proficiency in Selenium's Object Repository, employing various locators including Xpath.
- Generated insightful TestNG and extent reports for comprehensive test result analysis Tracked, reported, and contributed to the resolution of defects, ensuring clear and concise bug reports. Selected test cases for Regression Testing on modified builds. Possessed working knowledge of Jenkins for CI/CD

Project Undertaken

Pay sheet Application

- It generally includes collecting the list of employees to be paid, tracking the hours worked, calculating the employee's pay, distributing the salary on time, and recording the payroll expense
- Identify scenario for Testing
- Functionality Testing of each module
- Design Execute and maintain Automated Test Cases
- Script Debugging and script fixes Cross browser
- Testing and Parallel Testing
- Extent report generation
- Approach: Manual and Automation

E-Commerce Website

- Analysing the requirements and creating the test scenarios
- Functionality testing of each module
- Generation of Test Cases and Manual execution of the Test Cases.
- Identifying scenarios for testing
- Automation script creation and execution
- Bug Reporting and Tracking using JIRA tool
- Approach: Manual and Automation
