PROFILE

Actively seeking opportunities in Data Science, Machine Learning, Deep Learning, Natural Language Processing, Generative AI, and Data Analysis across India.

Data science aspirant with over 1.3 years of experience, who is constantly learning and seeking out new opportunities to grow his skills and knowledge in this exciting field. He has always been fascinated by the power of data to drive business decisions and solve complex problems. He is determined to use his skills and expertise to make a positive impact in the real world.

WORK EXPERIENCE

Data Scientist, Netzwerk Ai Pvt Ltd

Nov-2022-present | Bangalore

- Contributed to a state-wise sentiment analysis initiative for targeted marketing, utilizing web scraping techniques to gather stock market sentiment data. Applied advanced algorithms like KeyBERT and WordCloud for insights, shaping advertising strategies.
- As a project team member, Collaborated on the development and implementation of a vehicle keywords with the region and platforms, The cleaning process done by removing the pronouns, verbs, breaking conjunctions.
- Model building such as Working with NLP algorithm KeyBERT to get the keywords data region wise with different platforms Working with WordCloud algorithm to get the visual representation of the frequency of the keyword.

TECHNICAL SKILLS

Programming languages

- Python
- C

Key Skills

- Machine Learning (*Supervised Learning* / *Unsupervised Learning* / *Reinforcement Learning* / *Transfer Learning*)
- Statistics (*Hypothesis Testing* / *Regression Analysis* / *Analysis of Variance*)
- Natural Language Processing (*Transformers* / *Bert* / *GPTs* / *LLMs*)
- Deep Learning (*ANN* / *CNN* / *RNN*) - Generative AI (*LangChain* / *Google Palm*)

Packages and Libraries

- Pandas | Numpy | Matplotlib | Seaborn | Plotly | Streamlit (Data Visualization)
- Scikit-learn | PyTorch | Tensorflow | Keras | OpenCV | NLTK | Spacy | Hugging-face

Database

- MySQL

Productive AI

- Prompt Engineering (ChatGPT | JuliusAI)

Tools

- PowerBI

PROFESSIONAL SUMMARY

- Strong Mathematical foundation and good in Statistics, Probability.
- Experience of Machine learning algorithms like Simple Linear Regression, Multiple Regression, Polynomial Regression, Logistic Regression, SVM, KNN, Naive Bayes, Decision Tree, Random Forest, AdaBoost, Gradient Boosting, XGBoost, K-fold cross validation, Grid and Random Search.
- Skilled in Minimizing the cost function-based algorithms like: Gradient Descent, Stochastic Gradient Descent and Batch Gradient Descent.
- Good knowledge of Clustering algorithms like K means, Agglomerative Hierarchical Clustering, Divisive Hierarchical Clustering, and Dimensionality Reduction like PCA, LDA
- Hyper parameter tuning using Grid Search, Random Search.
- Performing Exploratory Data Analysis (EDA) on Raw data.
- Feature Engineering in Python – Missing value treatment, outlier handling, data transformation, Feature Selection and reshaping data using Python packages like Numpy, Pandas and Scikit Learn.
- Data Visualization techniques with help of Matplotlib, Seaborn and Tableau.
- Good knowledge of Deep Learning (DL) and hands-on with Neural Networks, Loss Function, Cost Function, Optimizers, Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN) and Recurrent Neural Networks (RNN), LSTM, Generative AI.
- Skilled in libraries like Numpy, Pandas, Matplotlib, Seaborn, Scikit Learn, TensorFlow, Keras, OpenCV and NLTK.
- Advance Understanding of Natural Language Processing (NLP) techniques like tokenization, stemming, lemmatization, Text Analysis, LLM, Matrix TFIDF and word2vec.
- Self-motivated team player with good communication and presentation skills.
- Good analytical and problem-solving skills.

DATA SCIENCE PROJECTS

- **Building a Next Best Action Model For Standard Bank** 
Churn customers or non-churn customers prediction based on the data provided, I have developed a model using **AdaBoost Classifier**.
- **Multi Disease Prediction Web App** 
I have developed a web app using streamlit for healthcare, using **CNN, Logistic Regression, Random Forest** Classifier algorithms, the users can check the health routine by giving relevant input.
- **Product Recommendation Engine** 
Created an e-commerce Recommendation engine for men/women products using **streamlit** for deployment and **the CNN, K-Nearest Neighbor** algorithms for building the model.
- **Detecting Human Face And Eyes** 
Basically, this is Computer Vision Project In this project I have used **cv2, numpy, pandas**, the face and eyes are detected by **Haarcascad** files in Jupiter notebook.
- **Customer Complaint Classification** 
The dataset is taken from Kaggle. The data is cleaned and processed before performing EDA. Built classification model to determine if a complaint mail from customer is prevent or not. The model is fitted with the dataset and checked for over and under fit, The model is tuned for accuracy and the spam rate is visualized.
- **Sentiment Analysis Web App** 
The text from user or from any context the web application will display the sentiment analysis in the text I have developed this model using streamlit.

- **Simple Hiring**

In this project I have created a web app with streamlit, it takes user input such as age, experience, salary, etc and gives us the output as weather the candidate is applicable for hiring process or not.

EDUCATION

- Bachelors in Robotics and Automation, TNU, Kolkata, India Jun 2020-June 2023
- Diploma in Mechanical Engineering, CIST, Kakinada, India Mar 2016-April 2019

CERTIFICATES

- Advanced Machine Learning Internship In AI-Labs ([Click here](#)) June 2021- July 2021
- Frontend Developer in Krify ([Click here](#)) July 2022- Oct 2022
- Data Science Internship in BEPEC Solutions ([Click here](#)) June 2022 – Dec 2022
