CURRENT PROJECT:

Target

Descriptions:

Target Corporation is an American retail corporation headquartered in Minneapolis, Minnesota. It is the seventh largest retailer in the United States, and a component of the S&P 500. The company is one of the largest American owned private employers in the united states. The company has found success as a cheap-chic player in the industry.

Responsibilities:

- To execute test case scenarios to analyze the life cycle of a web application using Selenium web drivers and efficiently use XPATH to discover components on web pages.
- Having knowledge of Page Object Model and Maven for web application automation testing. Extra ordinarily proficient at performing frameworks like Data Driven Testing and Cucumber BDD Framework Testing.
- Uploaded test cases to JIRA, executed them, and logged defects.
- Conducted Functional and Regression Testing.
- Participating in a Defect triage call with developers to resolve the issue as soon as possible.
- Retested the defects after they were resolved, and updated the defect report.
- Attending all agile ceremonies, including Sprint Planning, daily scrum calls, daily status calls, Sprint review, and Sprint retrospective.

PREVIOUS PROJECT:

Easy Jet

Descriptions:

Easy Jet is a low-cost airline based in the United Kingdom that offers affordable flights to a variety of domestic and international destinations. Easy Jet's clients are typically budget-conscious travelers looking for a cost-effective way to travel within Europe.

Responsibilities:

- Manually test and identify any flaws.
- Attending a Defect triage call with developers to resolve the issue as soon as possible.
- Script development, modification, and execution experience is required.
- All deliverables are peer-reviewed and handed off by the team.
- Developed test scripts with Eclipse, the IDE, and the TestNG framework.
- Creating and analyzing reports with TestNG.
- Executed test scripts and reported defects using a defect tracking tool.
- Reproduce error as per instructions obtained.
- Analyze root cause of error.
