About Me

- Passionate professional with **7 years of experience**: 5 years in Mechanical Engineering Design & Development and **2 years in Full stack development additional 2 years as freelance and cohort in Full stack projects**.
- Enrolled in the Post-Graduation Program in the Full Stack Development certification by **IIT ROORKEE via Great Learning (scored 7th)**.
- Extensive hands-on experience with Java, Spring Boot, Spring Security, Spring-JWT, Redis, HTML, CSS, React, MySQL, Redux, jQuery, Git, AWS, Cloud Computing, Docker, and more.
- Completed projects demonstrating proficiency in both frontend and backend development.
- In-depth knowledge of Agile methodology and experience in implementing it in product management.

Skills

- **Java | Spring-boot | Spring-security| Spring-JWT| REST |HATEOAS | Redis| HTML | CSS | Javascript | React | MySQL | Redux | Git**
- **AWS | Cloud Computing | Docker | Docker-compose | Unit Testing | Lambda | TOMCAT| Microservices | Spring Cloud | Linux | HTTP**
- **Microservices | Frontend | Backend | Full-Stack| FIGMA| Marvel|Whimsical.**

Projects

Engineer

Daimler Truck North America DTNA (Deputed)

Bengaluru, India

April 2019-April 2021

- Developed a beta version website showcasing real-time appearances for an Aftermarket Project.
- SPA for the website using React
- Ignited passion for web development, leading to a career transition
- **Technologies used: Basic Javascript, REACT, Spring-Boot.**

Developer

Coimbatore, India

Jul 2023- Dec 2023

- Developed a comprehensive Inventory Management Application for Franchise, enhancing operational efficiency and customer satisfaction
- Implemented robust features using Java Spring Boot and React technologies, including real-time stock updates, order management, and advanced reporting.
- Demonstrated expertise in technologies such as Docker, and CI/CD pipelines(Git Actions), showcasing a holistic approach to modern software development.
- **Technologies used: Java, SpringBoot, Docker, Git Actions.**

Full-Stack Development

Movie-Premiere

Jun -2023

- Implemented Factory Builder Pattern in the backend and used best REST-API practices.
- Utilized Redis cache framework to reduce database hits exponentially and improved **data retrieval speed by 60%**.
- Developed **responsive frontend** with React, React Router, and Redux.
- Introduced a **dedicated content management system** for real-time updates on movie releases.
- Working on a **Chat-Bot using Web-Sockets**.
- **Technologies learned: Java, SpringBoot, React, Docker, WebSocket.**

Product Management

Food Delivery App

Jan 2022

- Led surveys to identify customer **pain points** and created a **prototype**.
- Implemented Agile methodology and planned a **mockup timeline**.
- **Technologies used: Agile methodology, Product Requirement Document (PRD).**
