

Vikas Rajak

QA Engineer

Bangalore | Karnataka

vikasrajak07@gmail.com | +91-8839699563

Detail-oriented Quality Assurance Professional with a solid 1.3 years of experience in ensuring software quality. Specialised in creating and implementing effective testing frameworks and promoting open communication within cross-functional teams.

Key Skills

Testing: Smoke Testing, UAT, Sanity Testing, UI Testing, Compatibility Testing, Functional, Integration & Regression Testing

Automation: Selenium (Hybrid Framework), Playwright, Rest Assured

Tools: Postman, Newman, Git, GitHub, Jira, Height Application

Collaboration: Cross-team Communication, Release Note Composition, Feature Demonstrations

Certifications

Advance Selenium

Qspiders | August 2022

drive.google.com/file/d/1knpKnVVfslqx8gr...

Core Java, Manual Testing, Automation Testing

Education

Hindustan University | Chennai

B-tech | Mechanical Engineer (8.52 CGPA)

Professional Experience

QA Engineer

Techno Xo Private Limited | January 2023 - Present

Conducted Smoke Testing to ensure the stability of newly implemented features.

Executed comprehensive UAT on Web and Mobile applications (iOS/Android) for flawless production releases.

Implemented Sanity Testing on web and mobile applications post-production deployment.

Developed a Hybrid Framework from scratch, transitioning from Selenium to Playwright for faster execution.

Wrote API Test Cases, validated responses through Postman & Created POJO classes for API validation using Rest Assured.

Rigorously tested 45-second video uploads, playback, and performance.

Meticulously tested Pro Pass and shop product purchases, ensuring seamless payment processing (Payment Gateway).

Validated push notifications delivered via Firebase Cloud Messaging.

Conducted user walkthroughs, verifying clarity and ease of use.

Tested likes, reactions, and points/rewards systems, guaranteeing smooth operation.

Key Achievements:

Provided QA sign-off for successful releases, ensuring products meet quality standards.

Enhanced cross-team collaboration by composing detailed release notes for the Production team.

Conducted UI Testing, Compatibility Testing, and Functional, Integration & Regression Testing.

Utilised Git for version control and GitHub for codebase management.

Meticulously documented defects using Jira and Height Application.
