

VAISAKH VV

Professional Summary

Recent M. Com graduate with a strong foundation in business administration and a keen interest in data analytics. Possesses hands-on experience as a Business Administrator, where meticulous attention to detail and effective organizational skills were crucial in optimizing operational workflows. Completed a comprehensive data science course to acquire analytical skills, statistical modeling, and proficiency in tools like SQL, Advanced excel, Power BI and Python. Adept at leveraging data to provide insights for strategic decision-making. Eager to apply academic knowledge and practical experience to excel in a Data Analyst role, contributing to cross-functional data-driven solutions and business growth.

Technical Skills

- SQL (SQL Server, MySQL,)
- Python (Pandas, NumPy, SciPy, Matplotlib)
- Tableau
- Advanced Excel (VLOOKUP, Pivot Tables)
- Jupyter Notebook
- Machine Learning (SciKit-Learn,Keras)
- Exploratory Data Analysis (EDA)
- Microsoft Power BI
- ETL (Extract, Transform, Load)
- Database Management
- Business Analysis
- Data Visualization
- Data Modeling
- DAX (Data Analysis Expressions)

Soft Skills

- Communication skill
- Analytical Thinking
- Proficiency in English (written & verbal)
- Team Collaboration
- Presentation Skills
- Organizational Skills
- Leadership Quality
- Time Management

Projects

PRODUCTIVITY PREDICTION FOR GARMENT EMPLOYEES USING MACHINE LEARNING

- Developed a Regression **machine learning** model to predict the productivity performance of garment employees.
- Implemented a **RandomForestRegressor** model, achieving an impressive R2 score of 85.59%.
- The model demonstrated excellent accuracy with a **MAE** of 0.0239 and a **RMSE** of 0.0513 on the test set.
- Conducted thorough **feature engineering**, including the creation of meaningful features.
- Conducted insightful **Exploratory data analysis (EDA)**
- Summing up, the project highlights market potential with its real-time productivity predictions.
- Deployed an interactive **Streamlit** web app offering real-time productivity predictions with Enhanced usability.

PREDICTIVE MODELING FOR EMPLOYEE ATTRITION IN A CORPORATE ENVIRONMENT

- Developed and implemented a **classification** model to predict employee attrition, providing actionable insights.
- The **RandomForestClassifier** achieved high accuracy (100% on training, 90.28% on test).
- Only 48 wrong predictions out of 494 instances, the model shows promise for practical use in HR decision-making.
- Applied **SMOTE** to address class imbalance, ensuring the model's ability to generalize for both attrition classes.
- Significantly improves HR strategies with precise classification for enhanced employee retention and organizational health.
- Successfully **deployed** the model for practical use, enabling real-time predictions to enhance decision-making processes.

SALES DASHBOARD USING POWER BI

- Designed and developed a Food & Beverage Sale Analysis Dashboard in **Power BI** and Implemented visually appealing and user-friendly data visualizations for **key performance indicators (KPIs)**.
- Implemented **DAX** formulas to calculate key sales metrics such as total sales, average sales, and growth rates
- Used functions like **SUM**, **AVERAGE**, and **CALCULATE** for accurate metric calculations.
- Used **Power Query** for data cleaning and transformation tasks, ensuring data accuracy and consistency and

FINANCIAL CONSUMER COMPLAINTS DASHBOARD

- Created a dashboard with **Tableau** to visualize financial consumer complaints data.
- Gathered consumer complaints data and cleaned it, addressing missing values and inconsistencies.
- Created various visualizations to represent complaint trends and patterns.
- Implemented filters and ensured a user-friendly design for an engaging user experience.

Work Experience

DATA SCIENCE-ON JOB TRAINING – Hayago smart solutions private Ltd. – Hyderabad November 2023 - January 2024

- Proficient in creating visually compelling reports and dashboards using Power BI, effectively conveying complex data insights for implement Business Strategies.
- Utilized advanced features in Microsoft Excel for data analysis, data modeling including PivotTables, VLOOKUP, and other functions to streamline and enhance data processing.
- Demonstrated expertise in SQL for database management, including writing complex queries to extract, transform, and load data for analysis.

BUSINESS ADMINISTRATOR – Eduvae – Thiruvananthapuram June 2020 - December 2022

- Administer and maintain daily office operations, including greeting clients, responding to phone calls, and performing billing tasks with 100% accuracy.
- Scheduled appointments, meetings, and online classes for Students and Tutors.
- Assisted the director of accounting with various bookkeeping tasks, including budget and report preparation.

Education

AI - DATA SCIENCE – DDU-GKY (Offline) 2023

- Utilized data science tools and techniques to quickly familiarize with several datasets and data structures.
- Developed actionable insights from datasets by identifying trends, correlations, and repeatable processes.
- Created predictive models and visualizations to accurately forecast future outcomes.

MASTER OF COMMERCE (M.COM) – Indira Gandhi National Open University (IGNOU) 2021 –2023

- Majors: Business Mathematics, Economics, Business Research Methods

BACHELOR OF BUSINESS ADMINISTRATION – Calicut University 2017 –2020

- Majors: Business Analytics, Operations and Supply-chains Management, International Business

Certifications

- Data Science and AI, powered by **NASSCOM**
- Introduction to MongoDB (Coursera)
- Python for Data Science, AI & Development IBM (Coursera)
- AWS Cloud Technical Essentials (Coursera)
- Foundations Of business Intelligence (Coursera)
- Introduction To Big Data with Spark and Hadoop (Coursera)
- Generative AI: Elevate Your Data Science Career (Coursera)
- Stakeholder Management (Coursera)
