Project

e- Farming System

ASP.NET, C#.NET, MS SQL

This E-Farming website gives support to the village farmers who want to use this facility , want to learn how it is possible and how they can use e-farming to sell their products. This service boosts business communication and brings transparency in the system. This innovative site allows for good farmer - consumers communication. It allows farmers to login and sell product directly to dealers/consumers without any intermediates. Farmers can also know about new farming method and market value of their product to improve financially.
