SOFTWARE TESTER

Seeking a challenging role within a dynamic and growth-oriented company, where my extensive software testing experience, combined with Java programming skills, can contribute significantly to the enhancement of product quality. Eager to apply my knowledge to complex testing scenarios and embrace new challenges, all while fostering continuous learning and professional development.

KEY SKILLS

Languages	Core Java with selenium
Automation tools	Selenium/Webdriver , TestNG
Test Management Tools	Agile, Scrum, JIRA
Build Tools	Maven

PROFESSIONAL EXPERIENCE

Maxwell Global Software

January 2022 - Present

- Proven 2+ years of expertise in both manual and automation testing, utilizing Selenium WebDriver tool and Java programming language.
- Strong experience in writing scripts using TDD(TestNG) framework.
- Reviewing test cases and conducting peer review meetings with the team.
- Providing detailed walkthrough of test plans and test cases to the project team.
- Proficient in understanding Software Requirement Specifications, identifying essential test scenarios, and adhering to project standards to deliver high-quality results.
- Accurate time accounting and reporting, with a track record of on-time delivery of agreed-upon project deliverables and ability to multitask and meet strict deadlines.
- Extensive experience in SDLC and Agile Testing Process.
- Proficient in test case design, execution, and defect management, showcasing a meticulous and detail-oriented approach to testing activities.
- Familiarity with build automation using Maven tool and adept at handling elements in Selenium WebDriver, ensuring robust and efficient test automation.
- Detail Orientated and Resourceful in the completion of projects.
- Expertise in understanding and analyzing test requirements, Tracking changes and maintenance of test requirements.
- Experience of working in testing methodology Agile-Scrum model.
- Actively participating in project status meetings and maintaining effective communication with developers to facilitate seamless integration and defect resolution.
- Worked in regression testing, sanity testing, functional testing, automation and manual testing.

PROJECT EXPERIENCE

Project-1

TD Bank - Junior QA

Worked as a Junior QA at Toronto-Dominion Bank project (TD Bank), a prominent Canadian banking and financial services company with three primary business lines: Canadian retail, U.S. retail, and wholesale banking.

Accomplishments:

- Analysing business requirement in order to determine the test strategy covered for Manual Testing.
 - Preparing Test Case based on functional Specification documents to satisfy the business requirement.
 - Interacted with the development teams and analyst to understand the functionality to test it effectively.
 - Creating positive and negative scenarios and creating the test Data.
 - Played a role in reporting and tracking bugs, ensuring a systematic approach to identifying and resolving issues within the software.
 - Raise the defect and tracking it by using JIRA until closure.
 - Assisted senior QA analysts and testers with automation and manual testing
 - Reporting any defects / Observation on day to day basis.
-

Project-2

Buy it Direct - Automation Test Engineer

Played a key role as an Automation Test Engineer in the Buy it Direct (UK) E-commerce project, contributing to the analysis of user stories, preparation of test scenarios and cases, and automation script development.

Accomplishments:

- Formulated an automated tests that replaced 300+ manual test-cases that led to 70% reduction in manual effort.
 - Responsible for preparing Test scenarios and Test Cases.
 - Executed regression testing post-bug fixes, validating software stability and proactively identifying any potential new issues.
 - Analyzing the test cases and identifying which can be automated and which cannot be automated.
 - Implemented the Selenium framework to create 200+ regression tests that detected 3 issues.
 - Used Maven to build and run the Selenium automation framework.
 - Raise and track defects until closure and Re-test resolved defects.
 - Conducted numeric peer reviews of test scripts/cases and test data reports, emphasizing precision and maintaining high-quality documentation.
 - Identify the bugs and report the defects to development team through JIRA.
-

EDUCATIONAL EXPERIENCE

C Abdul Hakeem College

Bachelor's in business administration(2016 - 2019)
