## PROJECT 1:

**Client:** Matangazo

**Domain:** Ecommerce

**Description:**

Matangazo Online Shopping is a website that provides a convenient and user-friendly platform for individuals to engage in online shopping. The website offers a wide range of products from various categories, including electronics, fashion, home decor, appliances, beauty and more.

**Duration:** Dec 2021 to Present

**Responsibilities:**

- Developed test plans and participated in the sprint planning process.
- Analyzing and comprehending acceptance criteria and user stories.
- Determining which test situations should be automated.
- Constructed and carried out test cases in accordance with system requirements and user stories.
- Developed automation scripts and feature scenarios for Selenium using BDD Cucumber framework.
- Implemented automation frameworks integrating with TestNG and POM.
- I have run and fixed test scripts.
- Used JIRA for defect tracking and management.
- Finish tracking the bug report.
- Involved in reproducing failed scenarios and also in retesting at production.
- Participated in all phases of Agile, from preparing tests to holding retrospective meetings.

## **PROJECT 2 :**

**Client:** Pink Lily

**Domain:** Ecommerce

**Duration:** Oct 2020 to Nov 2021

### **Description:**

Pink Lily has become one of the fastest-growing online retailers in America, bringing women an ever-changing assortment of apparel, footwear, and accessories. Our growth has been quick, but it hasn't changed who we are. Pink Lily is still a family-owned and family-run business, proudly based in our hometown of Bowling Green, Kentucky. Since day one, we've focused on bringing fashion, positivity, and community to our customers. Our vision at Pink Lily is to be the brand that inspires women to achieve their best. Their daily engagement and input have shaped our curation while motivating us always to be a better partner in how we support our community.

### **Responsibilities:**

- Has experience preparing test procedures, test scenarios, test cases, and test data.
- Use black box testing techniques and functional testing.
- Participates in the execution of tests, results analysis, and defect reporting.
- Participation in RTM Preparation.
- Weekly update the project team and QA Manager on the testing status.
- Ensure that defects are fixed promptly.
- Arranging Test Environment to execute the test cases
- Communicating with Test Manager
