Azure Data Factory, Azure SQL DB/DW, Logic App, Key Vault,Data Bricks

Objective:

To seek a Challenging position in an organization where I can apply my knowledge and skills and enhance it at the same time there by contributing to the growth of the organization.

Professional Summary:

- 3.8years experience in total year as data engineer in soft deal technologies
- 2..8years of experience in data engineer in the role of **Azure Data Engineer**
- Excellent knowledge of ADF building components – Integration Runtime, Linked Services, Data Sets, Pipelines, Activities.
- Designed and developed data ingestion pipelines from on-premise to different layers into the ADLS using Azure Data Factory (ADF V2)
- Orchestrated data integration pipelines in ADF using various Activities like Get Metadata, Lookup, For Each, Wait, Execute Pipeline, Set Variable, Filter, until, etc.
- Implemented dynamic pipeline to extract the multiple files into multiple targets with the help of single pipeline.
- Automated execution of ADF pipelines using Triggers
- Have knowledge on Basic Admin activities related to ADF like providing access to ADLS using service principle, install IR, created services like ADLS, logic apps etc.
- Designed Azure Logic apps application to send pipeline success/failure alert emails, file unavailability notifications etc.
- Good Knowledge on Azure Key Vault resource and used Key Vault secretes in ADF.
- Experience in integration of various data sources like **Oracle, Flat Files**.
- Excellent analytical, problem-solving, communication and interpersonal skills.

Projects:

1. Birla Carbon GMR : AdityaBirla

Client :

Description:

GMR stands for Global Manufacturing Report , they used to provide the data in the form of excel sheets , as a data engineer i process that data using Data bricks and move those data into different layers (Bronze , Silver and Gold) in ADLS and finally we move the data into Azure SQL , later that will be utilized by the power BI team .

Responsibilities :

- 1) creating pipelines using ADF .
- 2) ADF pipelines monitoring .
- 3) deployment of ADF pipeline into different environments using Azure Devops.
- 4) data transformation and data validation using Azure Data bricks .
- 5) schedule job in ADF
- 6) set up a whole end to end pipeline .

Technologies / Tools used : Azure Data Factory , Azure Data bricks , Azure key-vaults , Azure Data Lake storage , Azure SQL

Educational Qualification:

- ❖ Completed **B.E/B.Tech in Electronics and Communication Engineering**, 2018 from Visvesvaraya Technological University.

Technical Skills:

- ❖ **Cloud Platform** : Microsoft Azure
- ❖ **Tools** : ADF, Azure SQL DB/DW, Logic App, Key Vault, Azure
- ❖ **Operating System** : Windows
- ❖ **Languages** : Oracal , SQL

Employment Profile:

- ❖ Currently working as **Data Engineer** for Tarento Technology Pvt Ltd, Since Jan 2023
- ❖ **Previously soft deal technologies Pvt Ltd**, Bangalore Since October 2019 to Jan 2023

Project

Client : Soft deal technologies- Product Development & support
Role : Data Engineer
Technologies & Tools. : Azure Data Factory V2 , key vaults , oracle
Organization : soft deal technologies
Duration : Oct 2019 to January 2023

Description:

Soft deal technologies has independent database servers for all its locations spread across the world. This project is mainly for creating an INTEGRATED Data warehouse by depending on the existing servers. Azure Data Factory is being used as an ETL tool. Data will be extracted from Oracle source to Data lake and SQL DW database. This Data warehouse will be used as a base to accommodate all the reporting requirements.

This project is used to capture all the retail activity for soft deal technologies. It is managing different types of messages like sales order, advance ship notice and invoice. Different reports are generated for end users like product wise statistical information, order wise reports and client wise statistics reports.

Responsibilities:

- ❖ Created Linked Services for multiple source system (i.e., Oracle, SQL Server, Teradata, SAP Hana, ADLS, BLOB, File Storage and Table Storage)
- ❖ Created Pipeline's to extract data from on premises source systems to azure cloud data lake storage; Extensively worked on copy activities and implemented the copy behavior's such as flatten hierarchy, preserve hierarchy and Merge hierarchy; Implemented Error Handling concept through copy activity
- ❖ Exposure on Azure Data Factory activities such as Lookups, Stored procedures, if condition, for each, Set Variable, Append Variable, Get Metadata, Filter and wait

- ❖ Configured the logic apps to handle email notification to the end users and key shareholders with the help of web services activity; create dynamic pipeline to handle multiple source extracting to multiple targets; extensively used azure key vaults to configure the connections in linked services
- ❖ Configured and implemented the Azure Data Factory Triggers and scheduled the Pipelines; monitored the scheduled Azure Data Factory pipelines and configured the alerts to get notification of failure pipelines

Personal Details

Name : Vinod Kumar c
Date of Birth : 05/04/1996
Gender : Male
Marital Status : Single
Languages known : English, Kannada, Telugu, Tamil
Permanent Address : Lingapara (v) ,mulbagal (T), Kolar(D), Karnataka – 563116

Declaration:

I do here by declare that the above information is given according to the best of my knowledge.
