Experience Summary

- A Senior Quality Engineer with over 6.6 years of experience in manual and over 4 years of working experience on automation development and testing using Selenium web driver Tool in domains: mortgage, consumer lending, education finance, and telecom
- Strong knowledge of STLC and SDLC with experience in writing and executing test cases and test scenarios
- Rich knowledge encompassing effective automation framework development, automation script development, test case design, test execution, and defect reporting
- A thought-out senior quality engineer with working experience in complex, agile, dynamic, onshore-offshore project environments
- Administered work with SQL queries on SQL Server with the intention of data retrieval and manipulation
- Utilized tools such as Git and JIRA
- Established, implemented, and improved QA infrastructure, test procedures, processes, and quality standards in accordance with overall development and product releases
- Gained exposure in developing, maintaining, testing, and releasing solutions; possess capabilities in delivery management focusing on maximizing customer satisfaction, process compliance, and software quality.
- Good experience in attending triage calls, participating in daily standup meetings, and retrospective
- Good experience in participating in regular internal progress, following up on the project with team members and other team leads, and conducting necessary

Project Experience:

Senior Software Test Engineer Tavant Technologies

Duration: Oct 2021 to Present (2 yrs.)

Project 1: PennyMac Independent Mortgage Co-Operation

Description: It is a mortgage project where the broker acts as a communicator between the borrower and lender. The borrower will apply for a loan through the portal, and the broker will provide the possible options based on his needs and his repayment capacity.

Project 2: SEB (South East Bank)

Client: SEB (South East Bank)

Technology: JAVA, SQL Yog, WIN SCP, Putty

Tools Used: JIRA

Role: Senior Quality Engineer (Automation and Manual)

Project Description:

Southeast Bank Education Loan Finance Portal acts as a single-window application for both borrowers and underwriters. The system enables the borrower to apply for student loan refinancing as well as undergraduate, graduate, and parent private student loans. The underwriters can work on the loan applications submitted by the borrower and thereby decide whether to approve or decline the loan.

Responsibilities:

- Analyzing and understanding the user Communicate with the business analyst for more information on the sprint stories and client requirements.
- Pro-active in daily scrum calls and retrospective
- Scripted test cases and done a review or peer review of the
- Prepared and Produced Requirement Traceability Matrix (RTM)
- Executed test cases and raised defects in the reporting tool (JIRA) to fix the
- Having hands-on experience in automation testing through Sprint User Story automation, Selenium Fire Frame work automation tool, and JIRA tool (managing the testing artifacts and defects)
- Performed different levels of testing, like system testing, regression testing, smoke testing, and sanity testing, before going live.
- Associated with other teams (Development Team, Technical Support, Customer Proxy, SME's) and communicated effectively in meetings and worked closely with them to complete the user story on or before
- Keeping all stakeholders informed about all the important technical issues, progress, and status

Senior Software Test Engineer

Black and White Business Solutions Private Ltd(Tavant)

Duration: Sep 2020 - Sep 2021 (1 year)

Project: Mortgage Banking (Fairway)

Client: Fairway

Technology: JAVA, J2EE, EJB, WebLogic and Oracle

Tools Used: JIRA

Role: Senior Quality Engineer (Automation and Manual)

Project Description:

Fairway is a Bank which make the home loan process as simple as possible by guiding through everystep. All of lending specialists are dedicated to finding the right loan-with the best rates, terms and costs-to meet your unique needs. Throughout the lending process, they provided regular loan upderstand progress reports so that anyone can hear the status of their loan.

Responsibilities:

- Analyzing and understanding the user stories. Communicate with Business Analyst for more information of the sprint stories and client requirement.
- Pro-active in Daily Scrum calls and Retrospective meetings.
- Scripted test cases and done Review / Peer Review of the same.
- Prepared and Produced Requirement Traceability matrix (RTM) document.
- Executed test cases and raised defects in reporting tool (JIRA) to fix the issue.
- Having hands on experience in Automation Testing through Sprint User Story automation, Selenium Fire Frame work automation Tool, JIRA tool (manage the Testing artifacts and Defects)
- Performed different level of testing like System testing, Regression testing Smoke and Sanity Testing before Go-live.
- Associated with other teams -Development Team, Technical Support, Customer Proxy, SME's and communicated effectively on meetings and worked closely with them to complete the user story on orbefore timeline.
- Keeping all stakeholder informed about all the important technical issues, progress and status.

Functional Tester

Dramatics (IBM)

Duration: Jan 2016-Mar 2019 (3 years, 3 months)

Project 3: AT&T (Telecom Domain):

Client: AT&T

Technology: Java, J2EE, SQL, Windows 2012

Tools Used: JIRA, MS Office

Role: Functional Tester

Project Description:

- AT&T is an American multinational telecommunications corporation. AT&T is the second largest provider of mobile telephone and the largest provider of fixed telephone in the United States, and also provides broadband subscription television services.
- There are projects aimed at automation in all phases of customer service delivery. The HALO project addressed the ordering phase of service. This renovation project is intended to automate the design and installation portions of service delivery. This project is necessary to improve productivity in the work centres and reduce cycle times. The corporate drivers for this project are automation, productivity, and cycle time reduction.

Responsibilities:

- Understanding the user stories Communicate with stakeholders and the internal team to gather more
- information of sprint activity.
- Scripted test cases and done Review / Peer Review of the same.
- Prepared and Produced Requirement Traceability matrix (RTM) document.
- Worked closely with developer and loaded test data and performed testing in lower environment
- Done manual test execution and raised defect report in JIRA tool to fix the bug.
- Planning and Synchronizing with the team for bug fix, validation and delivery.
- Maintaining the Testing artifacts in JIRA
- Performing System testing, Regression testing, Sanity and Smoke Testing
- Worked closely with other team and communicated latest status and make others to align on the samepage and complete the commitments on planned time.
- Actively participated in Triage calls, Daily Stand up and Retrospective meeting

Education

Anna University (ARJ College Of Engineering & Technology)

Bachelor of Engineering, Electrical and Electronics Engineering 2008 - 2012

Skills

Manual Testing • Test Automation • Regression Testing • Test Cases • Test Management • UserAcceptance Testing • System Testing • Software Testing • Functional Testing

Honors & Awards

Vinothkumar N - Tavant

Dec 2022

Received appreciation "On Spot team award" for production activity.

Vinothkumar N - Tavant

Oct 2021

Awarded as "Automation Senior Engineer" for my career growth from Manual to Automation.
